**NO.38** A customer wants to implement SAP Enable Now, cloud edition. What technical prerequisites do you have to consider?

Note: There are 2 correct answers to this question.

- \* All customer users need to be synchronized to the Identity Authentication service tenant before the implementation.
- \* The customer's firewall must allow access to SAP Cloud Platform from any end user computer.
- \* The Adobe Flash plug-in has to be installed on every end user computer.
- \* For authoring or consuming electronic performance support content using Desktop Assistant, either the SAP Enable Now App Launcher or a suitable Java runtime need to be installed on every end user computer.

**NO.39** What is the purpose of the Toolbox? Note: There are 2 correct answers to this question.

- \* It distributes custom scripts to the authoring team.
- \* It automates steps in the content production.
- \* It offers media libraries for common images.
- \* It provides templates to the authoring team.

**NO.40** What are typical characteristics of the Desktop Assistant cache? Note: There are 3 correct answers to this question.

- \* The lesson.js date is the base for the cache update.
- \* Only requested files will be cached.
- \* When a new Desktop Assistant version is installed, the cache must be deleted manually on every end user machine.
- \* It reduces the network load.
- \* The update frequency cannot be changed.

**NO.41** What do you have to consider when you set up a workflow? Note: There are 2 correct answers to this question.

- \* You must create permissions based on roles to secure your workflow.
- \* You must set watchers for each transition.
- \* There must be an appropriate set of statuses matching the lifecycle requirements of the customer.
- \* Each workflow status is restricted to be either the start or end point of a transition.

**NO.42** In what scenario should you use automated re-recording? Choose the correct answer.

- \* When the interface changed, but the process is still the same
- \* If the interface is the same, but the process changed completely
- \* If you re-record a simulation that was recorded in Quick Recording mode
- \* When the interface changed, and the process changed only slightly

**NO.43** What are the prerequisites for migrating a managed workarea in the Producer? Note: There are 2 correct answers to this question.

- \* The write permissions of the resources have been assigned to an author.
- \* The Producer client is offline.
- \* A backup of the workarea is created.

\* All components of SAP Enable Now have been upgraded to the latest version.

- \* Media objects
- \* Workareas
- \* Resources
- \* Text units
- \* Groups

**NO.47** What are characteristics of workflows in the content development process? Note: There are 3 correct answers to this question.

- \* Workflows may be defined for any content development process.
- \* Multiple workflows may be available for use in a single workarea.
- \* Only one workflow may be assigned to a single SAP Enable Now object.
- \* Workflows are assigned at the workarea level only.
- \* All statuses must be used in each workflow created.

**NO.48** What is the purpose of the compound document generation function? Note: There are 3 correct answers to this question.

- \* Merge different contents from a project into one document.
- \* Merge different contents from a book into one document.
- \* Merge SAP Enable Now contents and external contents into one document.
- \* Merge different contents from a workarea into one document.
- \* Merge different contents from a group into one document.

**NO.49** What are the benefits of using workflows? Note: There are 2 correct answers to this question.

- \* Workflows enable the author to proceed to the next content processing status without knowing the responsible contacts.
- \* Workflows allow complete automation of content production scenarios.
- \* Workflows prevent standard authors from editing resources.
- \* Workflows force all authoring roles to follow pre-defined object lifecycles.

**NO.50** What actions are possible with hidden objects in the project explorer? Note: There are 2 correct answers to this question.

- \* Define a time range for the object to be hidden.
- \* Create an object reference that is visible.
- \* Use the hidden objects to generate documents.
- \* Link to the hidden object and open it in the library.

**NO.51** Which of the following data types are supported in SAP Enable Now? Note: There are 3 correct answers to this question.

- \* HTML
- \* INTEGER
- \* TIMESTAMP
- \* USERNAME
- \* TEXT
