Exam Questions for PL-200 Updated Versions With Test Engine

Prerequisites for Microsoft PL-200 Exam

There are no official prerequisites that the candidates should meet before applying for the Microsoft PL-200 exam, but it is recommended that they have experience as an IT student or professional. The learners must also have a solid knowledge of Power Platform and its main features, familiarity with the security concepts as well as Microsoft Data verse. Moreover, the functional consultants should be well aware of the Dynamics 365 model-driven applications.

NEW QUESTION 30

You have a canvas app that contains the following text input fields: Id, FirstName, LastName. The app also has a button named Button1.

The OnSelect property for Button1 contains the following expression:

Collect(People, {Id:Id.Text, FirstName:FirstName.Text, LastName:LastName.Text}) For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement	Yes	No
The People collection is automatically created if it does not already exist.	<input type="radio"/>	<input type="radio"/>
When Button1 is pressed, if a record with the current value of Id.Text already exists in the People collection, the values for FirstName and LastName are updated.	<input type="radio"/>	<input type="radio"/>
If you update the record in the Collection function to include the value from a new field named Age, it will result in an error.	<input type="radio"/>	<input type="radio"/>

Statement	Yes	No
The People collection is automatically created if it does not already exist.	<input checked="" type="radio"/>	<input type="radio"/>
When Button1 is pressed, if a record with the current value of Id.Text already exists in the People collection, the values for FirstName and LastName are updated.	<input type="radio"/>	<input checked="" type="radio"/>
If you update the record in the Collection function to include the value from a new field named Age, it will result in an error.	<input type="radio"/>	<input checked="" type="radio"/>

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-clear-collect-clearcollect>

NEW QUESTION 31

You are creating a Power Virtual Agents chatbot that uses multiple topics.

Each user interaction can reference more than one topic.

You need to be able to capture a value in an initial topic and use it in subsequent topics.

Which type of variable should you create?

- * Context
- * Bot
- * Topic

Explanation/Reference:

<https://docs.microsoft.com/en-us/power-virtual-agents/authoring-variables-bot>

NEW QUESTION 32

You are a Dynamics 365 Customer Service developer.

A salesperson creates a chart.

You need to ensure that the chart is available to all users on the team.

What should you do?

- * Share the chart with the team.
- * Assign the chart to each person on the team.
- * Export the user chart to Power BI. Import the chart as a Power BI visualization.
- * Export the user chart for import as a user chart.

NEW QUESTION 33

You are using Power BI to build a dashboard for a company.

You must make the dashboard available to a specific set of users, including employees and five external users. The number of employees that require access to the dashboard varies, but usually less than 100.

Employees and external users must not be permitted to share the dashboard with other users.

You need to share the dashboard with the employees and external users.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- * Create a dynamic distribution list. Add all users to the distribution group and use the list to share the dashboard.
- * Sign into the Power BI service. Open the dashboard and select Share.
- * Enter the individual email address of internal and external users.
- * Sign into Power BI Desktop. Open the dashboard and select Share.
- * Clear the Allow recipients to share your dashboard (or report) option.
- * Create a distribution group. Add all users to the distribution group and use the list to share the dashboard.

Explanation/Reference:

<https://docs.microsoft.com/en-us/power-bi/collaborate-share/service-share-dashboards>

NEW QUESTION 34

A company has a custom website.

You need to embed a Power Virtual Agents chatbot into the website.

What should you use?

- * Webpage URL
- * Form ID
- * Bot ID
- * IFrame

Reference:

<https://docs.microsoft.com/en-us/power-virtual-agents/publication-connect-bot-to-web-channels>

NEW QUESTION 35

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are a Dynamics 365 Sales administrator for a software company. The sales team wants to attach a large number of supporting documents to customer records, but management does not want to incur the cost of additional storage.

The company does not have any Office 365 application integrations enabled.

You need to recommend a storage solution that keeps storage costs low.

Solution: Enable server-based SharePoint integration.

Does this meet the goal?

* Yes

* No

Explanation/Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/set-up-dynamics-365-online-to-use-sharepoint-online>

NEW QUESTION 36

A company creates a Power Virtual Agents chatbot.

You need to determine when live agents are engaged to provide support.

Which metrics should you use? To answer, drag the appropriate metrics to the correct processes. Each metric may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Metrics

Engagement over time

Session outcomes over time

Escalation rate drivers

Escalation rate

Answer Area

Process

Determine which topics are transferred to live agents most often.

Determine the number of chats per day that are transferred to live agents.

Metric

Metric

Metric

Metrics

- Engagement over time
- Session outcomes over time
- Escalation rate drivers
- Escalation rate

Answer Area

Process

- Determine which topics are transferred to live agents most often.
- Determine the number of chats per day that are transferred to live agents.

Metric

- Escalation rate drivers
- Session outcomes over time

NEW QUESTION 37

You set up a new instance of Dynamics 365 for Customer Service.

Users report a variety of issues working with cases on mobile devices.

You need to configure the mobile app to be able to view cases.

NOTE: Each correct selection is worth one point.

Scenario

Action needed

Users cannot see case records on mobile devices.

- Configure mobile settings set on the case entity level.
- Configure mobile settings at the field level within the case form.
- Configure a security role in the mobile permission set for appropriate users.

Users can open cases but cannot see the subject of the case.

- Configure mobile settings set at the case entity level.
- Configure mobile settings at the field level within the case form.
- Configure a security role in the mobile permission set for appropriate users.

Users report that they cannot access the system from the Dynamics 365 mobile app.

- Configure mobile settings set at the case entity level.
- Configure mobile settings at the field level within the case form.
- Configure a security role in the mobile permission set for appropriate users.

Scenario	Action needed
Users cannot see case records on mobile devices.	<input type="checkbox"/> Configure mobile settings set on the case entity level. <input type="checkbox"/> Configure mobile settings at the field level within the case form. <input type="checkbox"/> Configure a security role in the mobile permission set for appropriate users.
Users can open cases but cannot see the subject of the case.	<input type="checkbox"/> Configure mobile settings set at the case entity level. <input type="checkbox"/> Configure mobile settings at the field level within the case form. <input type="checkbox"/> Configure a security role in the mobile permission set for appropriate users.
Users report that they cannot access the system from the Dynamics 365 mobile app.	<input type="checkbox"/> Configure mobile settings set at the case entity level. <input type="checkbox"/> Configure mobile settings at the field level within the case form. <input type="checkbox"/> Configure a security role in the mobile permission set for appropriate users.

NEW QUESTION 38

You are creating a canvas app.

A user will click a button on each screen of a Power Apps app to proceed to the next screen.

You need to implement an action that selects the next screen that the user sees.

Which event should you handle?

- * OnLoad
- * OnCheck
- * ScreenTransition
- * OnSelect

NEW QUESTION 39

You are creating a new business process flow to qualify leads.

You create an action. The action is not available inside the Action Step.

You need to make the action available to the Action Step.

Which two steps must you perform? Each correct answer presents part of the solution.

NOTE Each correct selection is worth one point.

- * Activate the action.
- * Select Run as an on-demand process

- * Add at least one step to the action.
 - * Ensure that the entity for the action matches the corresponding entity for the business process flow stage.
- Reference:

<https://docs.microsoft.com/en-us/business-applications-release-notes/april18/microsoft-flow/add-action-business>

NEW QUESTION 40

A company plans to implement AI Builder to add intelligence to several business processes.

Each business process uses different sources and produces different outputs.

You need to determine which AI Builder model types to use.

Which model types should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Recognition requirement

Model type

Identify a person's age in a paragraph when written using the pattern **twenty years old**.

Entity extraction
Text recognition
Key phrase

Identify items and prices from an invoice.

Form processing
Text recognition
Object detection

NEW QUESTION 41

You create a report by using Power BI Desktop and publish the report to the Power BI service. You enable Power BI visualization embedding in a model-driven app.

You need to configure the model-driven app to display a Power BI tile

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Pin the Power BI report to a new dashboard in the Power BI service.
- Share the dashboard with the appropriate users.
- Add a Power BI tile to the dashboard and select the Power BI dashboard in the app.
- Create a new Power BI personal dashboard in the model-driven app.
- Create a personal dashboard in the model-driven app.
- Ensure the dashboard is available to the appropriate security roles.

Answer area

certify.vceprep.com

Actions	Answer area
Pin the Power BI report to a new dashboard in the Power BI service.	Add a Power BI tile to the dashboard and select the Power BI dashboard in the app.
Share the dashboard with the appropriate users.	
Add a Power BI tile to the dashboard and select the Power BI dashboard in the app.	Create a new Power BI personal dashboard in the model-driven app.
Create a new Power BI personal dashboard in the model-driven app.	Ensure the dashboard is available to the appropriate security roles.
Create a personal dashboard in the model-driven app.	
Ensure the dashboard is available to the appropriate security roles.	Pin the Power BI report to a new dashboard in the Power BI service.

NEW QUESTION 42

You create a new Power Virtual Agents chatbot for an organization.

Testing and production deployment of the chatbot are not complete.

You need to ensure that appropriate users can access the chatbot.

Which methods should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Method
Test the chatbot with unlicensed internal users	<ul style="list-style-type: none"> Use the demo website Share the chatbot to each user individually Share the chatbot to a security group containing all users
Allow other licensed internal users to edit the chatbot	<ul style="list-style-type: none"> Share the chatbot to each user individually Share the chatbot to a security group containing all users Deploy the chatbot to Microsoft Teams in your tenant
Deploy the chatbot to production for public consumption	<ul style="list-style-type: none"> Embed the chatbot code in an IFrame on your company's public website Deploy the chatbot to Microsoft Teams in your tenant Deploy the chatbot to AppSource

NEW QUESTION 43

On a Contact record, a user creates a Note record that contains the word running.

One week later, the user reports that they cannot find the Contact record associated with the Note record.

You need to find the Note record.

Solution: Use Quick Find search on the Notes list to search for the word run.

Does the solution meet the goal?

- * Yes
- * No

Instead use Relevance Search.

Note: Relevance Search finds matches to any word in the search term in any field in the entity. Matches may include inflectional words, like `stream`; `streaming`; or `streamed`; Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/configure-relevance-search-organization#what-is-relevance-search>

NEW QUESTION 44

You need to design the resort portal's email registration process.

Which solution should you use?

- * Default the invitation code from the email upon logging into the portal
- * Auto-populate the invitation code field on the sign in screen from the email link

- * Embed the invitation code in the email link URL
 - * Send the customer their username and temporary password in the email link
- Explanation

Scenario: Guests must receive a separate email to verify proof of ownership for their registration.

Note: You can setup redeem an invitation code for power apps portal.

Reference:

<https://carldesouza.com/how-to-setup-redeem-an-invitation-code-for-power-apps-portal/>

NEW QUESTION 45

You create a report by using Power BI Desktop and publish the report to the Power BI service. You enable Power BI visualization embedding in a model-driven app.

You need to configure the model-driven app to display a Power BI tile

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Pin the Power BI report to a new dashboard in the Power BI service.
- Share the dashboard with the appropriate users.
- Add a Power BI tile to the dashboard and select the Power BI dashboard in the app.
- Create a new Power BI personal dashboard in the model-driven app.
- Create a personal dashboard in the model-driven app.
- Ensure the dashboard is available to the appropriate security roles.

Answer area

www.vceprep.com

Answer Area

- Share the dashboard with the appropriate users.
- Add a Power BI tile to the dashboard and select the Power BI dashboard in the app.
- Create a new Power BI personal dashboard in the model-driven app.
- Create a personal dashboard in the model-driven app.
- Pin the Power BI report to a new dashboard in the Power BI service.
- Ensure the dashboard is available to the appropriate security roles.

www.vceprep.com

- 1 – Share the dashboard with the appropriate users.
- 2 – Add a Power BI tile to the dashboard and select the Power BI dashboard in the app.
- 3 – Create a new Power BI personal dashboard in the model-driven app.
- 4 – Create a personal dashboard in the model-driven app.
- 5 – Pin the Power BI report to a new dashboard in the Power BI service.
- 6 – Ensure the dashboard is available to the appropriate security roles.

NEW QUESTION 46

You have a canvas app that allows users to view, select and purchase products. The app uses a Gallery control to display products and checkboxes that allow users to select products.

When users select items from the product catalog, they move to a different screen to complete a purchase.

Users must be able to clear all product selections when they click the button.

You need to configure the button.

What should you do?

- * Use the Reset (Control) formula and pass the gallery control as a parameter to the Reset formula.
- * Use the Reload(control) formula and pass the gallery control as parameter to the Reload formula.
- * Use the ForAall() function to iterate through each item of the Gallery and clear user selections.
- * Set the OnCheck value to populate a collection and the OnUncheck value to remove the item from the collection. Clear the collection when the user selects the button.

NEW QUESTION 47

You need to design and create the solution for gathering contact information from guests for marketing purposes.

What should you use? To answer, select the appropriate options In the answer area.

NOTE: Each correct selection is worth one point.

Action	Solution
Extract business card data.	<div style="border: 1px solid black; padding: 5px;"><p>AI Builder</p><p>Common Data Service</p><p>Power Virtual Agents</p><p>Power Automate</p></div>
Implement the contact gathering solution.	<div style="border: 1px solid black; padding: 5px;"><p>Create a new entity extraction component.</p><p>Integrate the solution with Azure Cognitive Services.</p><p>Use a prebuilt AI model.</p></div>

NEW QUESTION 48

You create a report by using Power BI Desktop and publish the report to the Power BI service. You enable Power BI visualization embedding in a model-driven app.

You need to configure the model-driven app to display a Power BI tile

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Answer Area

- Pin the Power BI report to a new dashboard in the Power BI service
- Create a personal dashboard in the model-driven app
- Share the dashboard with the appropriate user in the app
- Add a Power BI tile to the dashboard and select the Power BI dashboard in the app
- Ensure the dashboard is available to the appropriate security roles

Answer Area

- Add a Power BI tile to the dashboard and select the power BI dashboard in the app
- Create a new Power BI personal dashboard in the model-driven app
- Ensure the dashboard is available to the appropriate security roles
- Pin the power BI report to a new dashboard in the Power BI service

- 1 Add a Power BI tile to the dashboard and select the power BI dashboard in the app
- 2 Create a new Power BI personal dashboard in the model-driven app
- 3 Ensure the dashboard is available to the appropriate security roles
- 4 Pin the power BI report to a new dashboard in the Power BI service

NEW QUESTION 49

A company has a custom website.

You need to embed a Power Virtual Agents chatbot into the website.

What should you use?

- * Webpage URL
- * Form ID
- * Bot ID

* IFrame

Explanation/Reference:

<https://docs.microsoft.com/en-us/power-virtual-agents/publication-connect-bot-to-web-channels>

NEW QUESTION 50

You are a Dynamics 365 Customer Service help desk administrator.

Cases entered in forms require different types of data to be stored in different types of fields.

You need to create forms for each of the following case types:

Case type	Requirement
Case type A	A new case form that includes a timeline
Case type B	A new case form that includes a business process flow
Case type C	A new case form that can display case data on an interactive dashboard
Case type D	A new mobile-friendly case form that requires minimal fields for record creation
Case type E	A new mobile-friendly case form that displays the subject, case title, and status fields from a parent case

Which form types should you create? To answer, drag the appropriate form types to the meet the data entry requirements. Each source may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Form types	Answer Area												
quick create	<table border="1"><thead><tr><th>Case type</th><th>Form type</th></tr></thead><tbody><tr><td>Case type A</td><td>Form type</td></tr><tr><td>Case type B</td><td>Form type</td></tr><tr><td>Case type C</td><td>Form type</td></tr><tr><td>Case type D</td><td>Form type</td></tr><tr><td>Case type E</td><td>Form type</td></tr></tbody></table>	Case type	Form type	Case type A	Form type	Case type B	Form type	Case type C	Form type	Case type D	Form type	Case type E	Form type
Case type	Form type												
Case type A	Form type												
Case type B	Form type												
Case type C	Form type												
Case type D	Form type												
Case type E	Form type												
main													
quick view													
card													

Answer Area

Requirement	Feature
Analyze misspellings, grammar variations, and semantic variations.	Slot filling Synonyms Smart matching Topics Fuzzy matching
Make the bot smarter by expanding the matching logic.	Slot filling Synonyms Topics
Extract a category selected by a user during a conversation into a variable for later use.	Slot filling Synonyms Smart matching Topics

Explanation

Case type	Form type
Case type A	main
Case type B	main
Case type C	main
Case type D	quick create
Case type E	quick view
