VMware 5V0-32.21 Actual Questions and Braindumps

NO.10 A system administrator has been tasked with creating a new network in preparation for onboarding a tenant with the following requirements:

* Provides a fully routed networking topology

* Advertises routes via BGP (Border Gateway Protocol)

* Prevents additional edge gateways from connecting to the network

* Allow virtual machines to connect to outside networks

Which network type will satisfy all of these requirements?
* Imported Network
* Isolated Network
* Direct Network

* Dedicated External Network

NO.11 On which type of network in VMware Cloud Director can fence mode be enabled?
* Isolated vApp Network
* Direct vApp Network
* External Network
* Routed vApp Network

NO.12 What is the default user account for managing VMware vCloud Meter service and viewing log files in the VMware vCloud Usage Meter web interface?
* imauditor
* root
* usagemeter
* admin

NO.13 The VMware Cloud Director administrator wants to make sure that the system is able to collect log bundles from all cells at once.

How should the administrator accomplish this goal?
* Install vRealize Log Insight agent on each cell to redirect logs to a centralized location.
* Configure a syslog server on each of the cells, and request the logs from the syslog server.
* Map the log location on the primary cell to a shared folder on each of the other cells in the server group, ensuring they all have read/write rights on the primary.
* Make sure the NFS server allows read-write access to the shared location by the root system account on each cell.

NO.14 Which deployment achieves high availability of VMware Cloud Director 10.x when using virtual appliances?
* Three application cell appliances with an external database
* Three primary appliances and setup database replication
* One primary appliance and two application cell appliances
* One primary appliance and two standby appliances

NO.15 What is the final configuration step before a tenant can log into a dedicated vCenter Server using Central Point of Management?
* The tenant user needs to configure the browser with the generated proxy settings shown in the tenant portal.
* The system administrator needs to configure the browser with the generated proxy settings shown in the tenant portal.
* The system administrator needs to configure additional permissions in vCenter Server for the tenant.
* The tenant user has to connect to a VPN connection in the network where the vCenter Server is connected.

NO.16 A cloud provider wants to adopt VMware Cloud Foundation for management and resource clusters and is planning on having separate management and user workload domains.

Which architecture achieves this goal?
* Multi-instance Management
* Standard
* Stretched
* Consolidated

NO.17 A cloud provider wants to limit the number of TKG clusters a tenant can provision while allowing other tenants an unlimited number of clusters.

Which setting will achieve this goal?
* Restrict them by specifying a quota in Organization settings.
* Restrict them through the Kubernetes Container Cluster Plugin.
* Configure restrictions inside the policy section if VMware Cloud Director.
* Configure the storage quota on the VDC.

NO.18 Which three resources are considered to be cloud resources in VMware Cloud Director? (Choose three.)
* ESXi hosts
* External Networks
* Network Pools
* Organization Virtual Data Center
* NSX ALB controllers
* VMware vSphere Virtual Data Center

NO.19 Which statement is accurate for virtual machines that need to be customized by VMware Cloud Director?
* It must use the VMware Tools for VMware Cloud Director.
* It should use only the tools provided by Windows operating system.
* It must be converted into VMware Cloud Director disk format first.
* It should have the latest VMware Tools installed.

NO.20 A system administrator is configuring new resources in a new VMware Cloud Director instance.

Which new resources can be created in VMware Cloud Director?
* Storage Policies, Content Library, vSphere Port Group, and VM Template
* Provider Virtual Data Center, vSphere Cluster, Organization, and vApp Template.
* Provider Virtual Data Center, Organization Virtual Data Center, External Network, and Network Pool
* Site Association, SAML Identity Provider, vSphere Lookup Service, and Custom Roles.

NO.21 The system administrator has to configure transfer server storage during the deployment of a VMware Cloud Director appliance.

What are two purposes of this storage? (Choose two.)
* For VMware Cloud Director appliance database backups
* As temporary storage for vApp and media uploads and downloads
* Used when upgrading a vSphere datastore to a newer VMFS version
* For network traffic when Cross-VDC Networking is enabled
* Used during Storage vMotion based migration of virtual machines

NO.22 The runtime lease of a virtual machine is about to expire. The administrator would like to extend the lease time.

Which action should be taken to complete this task?
* Renew the lease from the vApp action menu.
* Extend the storage lease, and runtime will automatically be extended.
* Use the /api/renewlease endpoint to define a new lease time.
* Renew the VM lease only after renewing the vApp lease.

NO.23 Having just deployed VMware Cloud Director, a service provider needs to create Provider Virtual Data Centers so their tenants can consume cloud resources through their Organization Virtual Data Centers.

Which two options can be used to create Provider VDCs? (Choose two.)

* Service Provider Admin Portal
* vSphere Client
* Tenant Admin Portal
* Operations Manager Portal
* vCloud API

NO.24 What are three components in the VMware Cloud Director Availability solution that are used to enable migration from an on-premises data center to a service provider’s VMware Cloud Director environment over the internet? (Choose three.)
* Cloud Replicator Appliance
* Cassandra database
* RabbitMQ Server
* VMware Cloud Director Availability On-Premises Appliance
* Standalone Edge Appliance
* Cloud Tunnel Appliance

NO.25 Which allocation model can only be non-elastic?
* Reservation Pool
* Allocation Pool
* Pay-As-You-Go
* Flex

NO.26 Which solution from the VMware Cloud Provider Platform provides a true multi-tenant, self-service platform for infrastructure services?
* VMware Cloud on AWS
* VMware vRealize Automation
* VMware Cloud Foundation
* VMware Cloud Director

NO.27 An administrator is planning a new VMware Cloud Director deployment and is concerned about secure communications between the clients and servers.

Which two recommended steps would ensure secure communications between the clients and servers? (Choose two.)
* VMware Cloud Director automatically creates self-signed certificates.
* Create a single certificate for each member of the server group, and import the certificates into the host keystores.
* Create two certificates for the server group, and import the certificates into each cell’s keystore.
* Create a single certificate and upload it through the Service Provider Portal to all members of the server group.
* Create or use an existing wildcard certificate, and import it into each cell’s keystore.
