NEW QUESTION 13

You are developing a module and need to add another column to a table introduced by another module `MyCompany_MyModule` via db schema.

How do you do that?

- * Create a `etc/db_schema.xml` file in your module, add the column and run `bin/magento setup:upgrade`
- * Create a `etc/db.xml` file in your module, add the column and run `bin/magento setup:db-schema:upgrade`
- * Run a command: `bin/magento setup:db-schema:upgrade <table> <column definition>`
- * Create a `etc/db_schema_whitelist.json` file in your module, add the column and run `bin/magento setup:upgrade`

NEW QUESTION 14

You are customizing the display of product details page. On this page ur customer need to change the url in which the product

category name will be appear as <http://mystore.com/women/tops-women/helena-hooded-fleece.html>, Keeping ,maintainability in mind, How to get product url with category?

- * Admin -> Stores -> Configuration -> Catalog -> Catalog -> Search Engine Optimization – > “Use Categories Path for Product URLs” set to “Yes”
- * It is not possible to display Categories name on product url
- * `$product->setCategoryId($categoryId)->getProductUrl();`
- * You Can Build category URL path `vendor/magento/module-catalog-url-rewrite/Model/Category/UrlPathGenerator.php`

NEW QUESTION 15

A merchant asks you to extend customer functionality to allow customer accounts to be associated with two or more billing addresses.

How is this implemented?

- * By adding the attribute like `customer_address_billing2` and customizing both My Account and Checkout functionality to use that new attribute
- * By changing the System Configuration setting: Customer>Allow multiple billing addresses to Yes
- * By altering the `customer_entity` table, adding the field `billing_address2`, and customizing both My Account and Checkout functionality to use that new field
- * This is out-of-the box functionality

NEW QUESTION 16

A module `MyModule` needs to send notifications to customers only when the account was modified from a mobile app using the REST web APIs.

You decided to implement an observer for `customer_save_after_data_object` event.

In which file do you declare the observer?

- * `etc/webapi_rest/events.xml`
- * `etc/adminhtml/events.xml`
- * `etc/webapi/rest_events.xml`
- * `etc/events.xml`

NEW QUESTION 17

The module `MyCompany_MyModule` will add a new page to the admin interface at the URL path `admin/mycompany/entity_grid`.

How do you name the file containing the action controller class so the admin router matches the path to the class?

- * `Controller/Adminhtml/Entity/Grid/Index.php`
- * `Controller/Adminhtml/Mycompany/Entity/Grid.php`
- * `Controller/Adminhtml/Entity/Grid.php`
- * `Controller/Adminhtml/Mycompany/Entity_Grid.php`

NEW QUESTION 18

What is the connection between product attribute sets and categories?

- * Categories have no connection to product attribute sets, and any product can be assigned to any category
- * Each category is linked to a single product attribute set, and only products from that attribute set are allowed in the category
- * Each category is linked to a single product attribute set, and only products from that category’s set or any of its parent

categories’

* Categories can be connected to multiple product attribute sets, and only products from one of those sets are allowed in the category

NEW QUESTION 19

Magento 2’s architecture uses code to bootstrap a custom module that resides in app/code.

What two files are required to make a module usable? (Choose two.)

- * Helper/Data.php
- * etc/config.xml
- * etc/module.xml
- * registration.php

NEW QUESTION 20

You are tasked with ensuring customers who log into the site are authorized. By default, this consists of ensuring the customers email and password match the values in the database. On this project, you need to verify additional data in this process.

Keeping in mind upgradeability, how is this done?

- * Create a before plugin for MagentoCustomerApiAccountManagerInterface’s authenticate method
- * Create a mutation of a CustomerInterface object to intercept the username and password
- * Create an event observer for the user_save_after observer
- * Override MagentoCustomerControllerAccountController.php

NEW QUESTION 21

You have to install a new module on the production environment. All the module is adding a new product attribute. You enabled maintenance mode, copied the module code, run bin/magento setup:upgrade and disabled maintenance mode.

What two risks does this process pose? (Choose two.)

- * It will clean all caches which will cause a performance degradation
- * The new attribute will be invisible on the storefront until the cache is cleaned manually
- * It will void all active sessions
- * It will clean static assets from the pub/static folder

NEW QUESTION 22

You got a notification about error that occurred on a production environment. The merchant gave you the error identifier.

How do you find the error message based on the identifier?

- * An error is written to the var/log/exception.log file including the identifier
- * The error is sent to the pre-configured error email with the identifier in the subject
- * A file with a name matching the identifier is written to the var/report folder
- * An error message is written to the database table error_log with an error_id field matching the identifier

NEW QUESTION 23

You are reviewing a theme in app/design/frontend/MyCompany/MyTheme and see the file etc/view.xml.

What is the function of this file?

- * It configures Grunt to compile assets for the theme
- * It stores theme and image configuration values
- * It specifies the applicable CSS files for the theme
- * It informs Magento that the theme is present and available for use

NEW QUESTION 24

You are working on a jewelry store that sells rings. Each ring allows an adjustment in size. The customer specifies finger size in inches and the merchant physically adjusts the stocked ring to the required size.

How is this represented in Magento?

- * Using custom options, with rings as simple products
- * Using categories, with each ring size as a separate product
- * Using configurable products, with ring size as an attributive value
- * Using custom options, with rings as bundle products

NEW QUESTION 25

Which three scopes can be used to set different System Configuration values in Magento? (Choose three.)

- * Language
- * Area
- * Store View
- * Store
- * Website

NEW QUESTION 26

What happens when a category's is_anchor attribute is set to 1?

- * Products without a specified category will be associated with this category
- * The customer will see all products from all children of the category
- * This is the default category for a website
- * The category will always be visible in the menu

NEW QUESTION 27

You are setting up a brand new Magento installation for a merchant who is migrating from Magento 1 to Magento 2.

Keeping in mind upgradability and the need to customize, which one do you choose?

- * Create a new Magento instance using composer create-project
- * Clone the magento/magento2 GitHub repository
- * Run `php bin/magento setup:migrate <path-to-m1-installation> <new-version>` command
- * Create a new Magento instance by using the bin/magento install command

NEW QUESTION 28

You need to control access to a custom controller action.

How do you tell Magento about this new control option?

- * Create `etc/acl.xml` and add `<resource id='MyCompany_MyModule::customAction'; />`

- * In the controller, implement the `_isAllowed` method.
- * Create `etc/adminhtml/acl.xml` and add `<acl id='MyCompany_MyModule::customAction';>`
- * Use the CLI to add the new resource option.

NEW QUESTION 29

What are two functions of a resource model? (Choose two.)

- * It executes create, retrieve, update and delete actions for an entity
- * It loads lists of entity models
- * It is made available in the Magento API for the purpose of data manipulation
- * It maps an entity to one or more database rows

NEW QUESTION 30

You are debugging a problem resulting from a recently deployed around plugin. The plugin is intercepting the `doSomething` method. The `aroundDoSomething` plugin method is called successfully, but the original `doSomething` method is no longer being executed as expected.

What is causing this?

- * The sort order of the plugin is too high and supersedes the priority of the intercepted method
- * The plugin implementation returned something other than its callable argument
- * The plugin implementation is skipping the execution of its callable argument
- * The plugin implementation overlooked using the `AbstractPlugin` parent class

NEW QUESTION 31

You are reviewing a Magento module and see a directory named `Service`.

What can you determine from this directory's name?

- * It is where the API response cache is stored
- * It is where API-related configuration resides
- * It is where the module's service contracts are stored
- * You need to review the files in this folder to understand its purpose

NEW QUESTION 32

You are reviewing a module to some special functionality to the Magento 2 application, You see directory `/CustomerData`,

What task you think in this directory contain script for this modules?

- * Contains section files that works with the data stored on the client side.
- * Contains aggregated functionality.
- * Contains localization files.
- * Contains view files, including static view files, design templates, email templates, and layout files.
