C_HANADEV_17 Dumps for Pass Guaranteed - Pass C_HANADEV_17 Exam 2022

Topics of SAP C_HANADEV_17: SAP Certified Development Associate - SAP HANA 2.0 SPS05 Exam
The SAP C_HANADEV_17 (SPS05) exam is designed based on the implementations, management and customization areas which cover the entire SAP C_HANADEV_17 Development. Following are the major topics along with their weight-age in the examination, giving you a clear view of which topics, you should focus on for the certification of SAP C_HANADEV_17 (SPS05).
Note: SAP reserves the right to change and update the content (topics, items and weight-age) at any point or time.

- Operations of SAP C_HANADEV_17: more than 12%

Knowledge of setting up an administration and operational strategy for SAP C_HANADEV_17. Using SAP C_HANADEV_17 Studio and HDBSQL to Start, Stop, Analyze Performance, and Transport Management.

- Monitoring of SAP C_HANADEV_17: more than 12%

Knowledge of using DBA Cockpit, SAP C_HANADEV_17 Studio, SAP C_HANADEV_17 Cockpit, and the trace files to set up and execute monitoring for SAP C_HANADEV_17.

- System Architecture: 8 to 12%

Knowledge of designing system architecture for SAP C_HANADEV_17 implementation includes hardware sizing, data persistence, network requirements, and integration with the existing customer landscape.

- Users & Authorization: 8 to 12%

Knowledge of setting up authorization traces for describing SAP C_HANADEV_17 authorization concept, different authorization privileges, and SAP C_HANADEV_17 database repository.

- Security: 8 to 12%

Knowledge of Describing SAP C_HANADEV_17 authorization and authentication concepts and setting up the encryption techniques and auditing processes for SAP C_HANADEV_17.

- Backup & Recovery: 8 to 12%

Knowledge of designing a strategy for backup and recovery of SAP C_HANADEV_17. Also, understand the backup catalog and the configuration files for database copy scenarios.

- Troubleshooting for SAP C_HANADEV_17: 8 to 12%

Knowledge for analysing system files, using SQL console, and troubleshooting SAP C_HANADEV_17 system performance by configuring traces.

- SAP C_HANADEV_17 Installation & Upgrades: 8 to 12%

Knowledge of evaluating pre-requisites for SAP C_HANADEV_17 installations, verifying hardware and operation systems, and describing installation and post-installation tasks.

- Database Migration to SAP C_HANADEV_17: 8 to 12%

Knowledge of describing Database Migration Operation (DMO) benefits. Its procedure steps, different migration options, preparation steps, and techniques to reduce downtime.

- High Availability & Disaster Tolerance: less than 8%

Knowledge of designing a strategy for high availability and disaster recovery, explaining high availability and system replication features of SAP C_HANADEV_17.

Based on the above-mentioned syllabus and their related weight-age, it is clear that there is no one topic a candidate should focus on or a candidate can leave while preparing for the examination. It is important for the candidate to go through and be proficient in each and every topic. **C_HANADEV_17 exam dumps** is the best preparation material for this examination.

NO.66 Which services can you use in SAP HANA 2.0, express edition? Note: There are 3 correct answers to this question.

- * Text analytics
- * Dynamic tiering
- * System replication
- * Columnar OLTP and OLAP
- * Multi-core and parallelization

NO.67 Which SAP HANA system views contain information about the object ownership? There are 2 correct answers to this question.

- * ROLES
- * TABLES
- * SCHEMAS
- * OBJECTS

NO.68 Which parameters do you need for the APPLY_FILTER function? Note: There are 2 correct answers to this question.

- * Filter condition
- * Dataset
- * Join condition
- * Entity set

NO.69 To perform a specific task of an XSadvanced application, what does a user need? Please choose the correct answer.

- * To have directly assigned a Scope
- * To have directly assigned a Role Collection
- * To be assigned to a Space

* To be assigned to an Organization

NO.70 You develop an OData service using XSODATA. Which HTTP commands can you use to define the operations on the resources?

There are 3 correct answers to this question.

- * INSERT
- * POST
- * GET
- * READ
- * PUT

NO.71 You created several database tables in a multi-target application and need to keep their names as short as possible.

Which parameter of the .hdinamespace file do you set to ignore?

- * subfolder
- * mixinTypes
- * hdbtable
- * name

NO.72 Which metadata declarations can you specify in an SQLScript procedure when you use the SAP HANA Deployment Infrastructure?

Note: There are 2 correct answers to this question.

- * Authorization
- * Default schema
- * Security
- * Language

NO.73 Which module do you use to run an SQL statement against the SAP HANA database?

- * @sap/xsenv
- * @sap/hdbext
- * @sap/xssec
- * @sap/hdi

NO.74 You need to bind UI5 controls to a data source.

Between which parts of the SAPUI5 application must you create databinding?

- * Model and Controller
- * Controller and View
- * View and Model
- * Application Descriptor and View

NO.75 You are working on an entity using Core Data Services.

Which properties can you define inside the Technical Configuration section?

Note: There are 2 correct answers to this question.

- * Import
- * Storage Type

- * Index
- * Association

NO.76 Which application runtimes are currently supported by the SAP Cloud Application Programming Model?

There are 2 correct answers to this question.

- * Python
- * Java
- * Node.js
- * Go

NO.77 Which development environment does SAP recommend to develop an SAP HANA extended application services; advanced model (XS advanced) multi-target application?

- * SAP HANA studio
- * ASAPdevelopment tools
- * SAP web IDE for SAP HANA
- * SAP HANA Web-based Development Workbench

NO.78 An OData service contains an entity set called Products. Which resource path do you add to the OData service URL to view all available products?

- * /Products
- * /Products/”
- * /Products/ALL
- * /Products/\$metadata

NO.79 Which of the following activities are part of the development lifecycle using SAP HANA extended application services, advanced model (XS advanced)?

Note: There are 3 correct answers to this question.

- * Synchronize source with GIT repository
- * Store source in SAP HANA repository
- * Activate artifacts via _SYS_REPO
- * Create an MTA project
- * Export project as MTA archive

NO.80 You use APPLY_FILTER to add a dynamic WHERE clause on SELECT statements.

On which objects can you apply the filter?

Note: There are 2 correct answers to this question.

- * Database tables
- * Intermediate table variables
- * Virtual tables
- * Scalarvariables

NO.81 In application development with XS advanced, which of the following entities belong to a specific SPACE?

There are 2 correct answers to this question.

- * Applications
- * Processes

- * Users
- * Organizations

NO.82 Which of the following joins can be defined only with multi-column join in calculation views? Please choose the correct answer.

- * Temporal join
- * Dynamic join
- * Text join
- * Multi join

NO.83 After reviewing the SQL Analyzer results, which of the following would you consider for optimizing the performance? There are 2 correct answers to this question

- * Re-prioritize with Workload Management.
- * Change the data model.
- * Use CE functions.
- * Modify SQL hints.

NO.84 You develop native SAP HANA applications in SAP HANA extended application services, advanced model (XS advanced).

What are some of the advantages compared to developing in SAP HANA extended application services, classic model (XS classic)?

Note: There are 3 correct answers to this question.

- * No additional SAP HANA components are required.
- * It supports different runtime containers.
- * The source code repository is built into the SAP HANA database.
- * Advanced GIT/GERRIT source code management is available.
- * The application layer can be separate from the database.

NO.85 You implement a native SAP HANA application using SAP HANA extended application services, advanced mode (XS advanced) and SAPUI5.

Where is the UI rendering executed?

- * On the XS advanced application server
- * On the SAPUI5 HTML5 module
- * On the front-end client device
- * On the SAP Fiori front-end server

NO.86 What are the main SAP HANA engines responsible for executing calculation views? There are 3 correct answers to this question.

- * XSEngine
- * Join Engine
- * OLAP Engine
- * Java Engine
- * Calculation Engine

Introduction to SAP C_HANADEV_17: SAP Certified Development Associate - SAP HANA 2.0 SPS05 Exam

The ?SAP Certified Development Associate - SAP HANA 2.0 SPS05? certification exam verifies that the candidate has the knowledge to develop native software applications running on the SAP HANA Platform. This certificate builds on the basic knowledge gained through related SAP HANA training. The training covers the development tools and languages, used to realize the different parts of a software application in SAP HANA.

- Empower individuals to execute tasks with confidence and skill- Provide individuals with a mark of excellence that is extremely recognized by the clients and sought within across the industry.- Differentiate individuals in a crowded job market
