

2022 Valid E_HANAAW_17 Exam Updates - 2022 Study Guide [Q21-Q39]

2022 Valid E_HANAAW_17 Exam Updates - 2022 Study Guide
E_HANAAW_17 Certification - The Ultimate Guide [Updated 2022]

NO.21 Explain the Authorization Concept and the types of privileges associated with it? There are 3 correct answers to this question

- * Analytic privileges
- * Package privileges
- * Application privileges
- * Object privileges
- * System privileges

NO.22 What are the two types of editors available in ADT? There are 2 correct answers to this question.

- * Eclipse (native)
- * Client (native)
- * SAP (GUI)
- * ABAP (native)

NO.23 What do you understand by the SAP HANA Software Optimization? Please choose the correct answer.

- * Speed up the processing within the database
- * Bring logic to where the data is calculated first then only move to results
- * Provide combinations of objects and partitioning
- * Huge potential for hybrid database

NO.24 What allows you to resolve errors quickly or warnings reported about the code? Please choose the correct answer.

- * Code execution
- * Quick Fix
- * Debug perspective
- * ABAP debugger

NO.25 You plan a database migration to SAP HANA and want to check your ABAP coding for performance optimization potential.

Which Code Inspector check variant can you use?

- * PERFORMANCE_OPT
- * CHECK_PERFORMANCE
- * FUNCTIONAL_DB
- * PERFORMANCE_DB

NO.26 In order to get language-specific data, which join is used in SAP HANA?

- * Referential Join
- * Language join
- * Text Join
- * It is not possible to fetch language-specific data in HANA

NO.27 Which is better from performance point of view?

- * SQLScript Procedure
- * Modeling Views

NO.28 You developed an ABAP program using ABAP Development Tools for SAP NetWeaver. How can you execute it? 2 ans

- * In the Project Explorer view, right-click the program and choose Run As -> ABAP Application from the context menu.
- * Use the Open Development Object dialog (CTRL+SHIFT+A) and enter <Program_Name>/Execute in the search field.
- * Open the ABAP program in the ABAP Development perspective and execute it using the shortcut F8.
- * Open the ABAP program in the ABAP Development perspective and execute it using the shortcut F1.
- * Call transaction SRUN_ADT and enter the name of the ABAP program.

NO.29 You define and implement an AM DP. What do you have to list after the USING clause? There are 3 correct answers to this question.

- * ABAP dictionary tables used in procedure body
- * ABAP dictionary views used in procedure body
- * CE function used in procedure Body
- * AMDP Used in Procedure Body
- * SAP HANA views used in procedure body

NO.30 What is the central goal of using SAP HANA? Please choose the correct answer

- * Positive Impact on Business
- * Accelerate Performance
- * To set Priorities for system
- * Monitor database for record keeping

NO.31 Which system schema contains the list of Activated and inactive Objects?

- * Used to access local or remote database system
- * Maintain, Monitor and test secondary database connection
- * Use Schema for the Connections
- * Maintain only HANA specific objects

NO.32 What views will be most efficient for General Modeling Principles? There are 2 correct answers to this question

- * Attribute view
- * Schema view
- * Column view
- * Analytical view

NO.33 Discuss the basic approach of classical ABAP programming? There are 2 correct answers to this question.

- * Get all the data you need on the application server and do your processing in ABAP
- * Creating and consuming all the contents from network
- * Keep load from the database
- * Collect all the data and perform Parallel processing in ABAP

NO.34 Which option in SAP NetWeaver Gateway Service Builder (transaction SEGW) can be used to implement the consumption of a Core Data Services view?

- * Map to Data source
- * Consume CDS view
- * Relate to Business Entity
- * Read from DDL source

NO.35 What are the steps involved in supporting a database oriented programming model? There are 2 correct answers to this question.

- * A new and advanced Open SQL
- * Core Data services
- * Buffer system services
- * Advanced and specific models

NO.36 Which code-to-data capability is responsible for the Optimizations & Translation of Open SQL SELECT FOR ALL ENTRIES clauses into native SQL?. Please choose the correct answer.

- * Database Optimization
- * Transparent Optimizations
- * HANA Specific features
- * Buffer system Optimization

NO.37 What are the two different kinds of Identifiers used to represent names used in SQL statement? There are 2 correct answers to this question

- * Delimited identifiers
- * Limited identifiers
- * Undelimited Identifiers
- * Numeric identifiers

NO.38 Which SAP HANA engine executes Calculation view? (2 answers)

- * OLAP Engine
- * Calculation Engine
- * SQL Engine
- * JOIN Engine

NO.39 Which engine is used to execute Analytic View?

- * SQL Engine
- * Calc Engine

- * OLAP Engine
- * Join Engine
