NEW 2022 Certification Sample Questions C-TS422-2020 Dumps & Practice Exam

SAP C-TS422-2020 Exam Description:

The "SAP Certified Application Associate - SAP S/4HANA Production Planning and Manufacturing" certification exam validates that the candidate possesses the fundamental and core knowledge required of the SAP S/4HANA Manufacturing consultant profile. This certification proves that the candidate has an overall understanding and in-depth technical skills to participate as a member of a project team in a mentored role.

NEW QUESTION 65

You have a quality control check to avoid using a high-value component in faulty materials in subsequent assembly operations. How do you account for potential scrap of the high-value material?

- * Enter the component scrap in the material master of the assembly and set the net indicator in the routing operation where the component is used
- * Enter the assembly scrap in the material master of the component and set the net indicator in the component of the bill of material of the assembly.

- * Enter the operation scrap and set the net indicator in the component of the bill of material of the assembly.
- * Enter the component scrap in the component of the bill of material of the assembly and leave the net indicator initial in the bill of material.

NEW QUESTION 66

You are transferring data from SAP S/4HANA to embedded PP/OS. What master data objects are mapped to a location? There are 3 correct answers to this question.

- * Workcenter
- * Customer
- * Plant
- * Supplier

NEW QUESTION 67

Advanced Planning is delivered with standard out-of-the-box order and resource evaluations. Which evaluations are available? There are 2 correct answers to this question.

- * Order list
- * Production list
- * Resource utilization
- * Resource overview

NEW QUESTION 68

What is the purpose of collective orders?

- * To post production costs on a cost collector instead of the production order
- * To combine order management of co-products and by-products with the main product
- * To post any component withdrawals single back flush with order confirmation
- * To manage production orders for an entire finished product on multiple levels

NEW QUESTION 69

Advanced Planning uses master data and transaction data from SAP S/4HANA. In which data object can you set the advanced planning flag? Note: There are 2 correct answers to this question.

- * Work center
- * Material
- * Production version
- * Plant

NEW QUESTION 70

How can you set up the supply source for the SAP Kanban process? Note: There are 3 correct answers to this question.

- * Using purchase orders for external procurement
- * Using stock transfer reservations for stock transfer
- * Using run schedule quantities for in-house production
- * Using purchasing costs for automated source prioritization
- * Using quotations for internal and external procurement

NEW QUESTION 71

How can Production Planning and Detailed Scheduling (PP/DS) enhance the standard planning functionality?

- * By providing future demands from demand figures in the past
- * By providing replenishment proposals with exact times
- * By providing cross-plant planning and deployment
- * By providing multilevel material requirements planning

NEW QUESTION 72

What are some uses for the low-level code assigned to each material? Note: There are 2 correct answers to this question.

- * It is used in MRP to determine the sequence in which materials are planned.
- * It is used by engineering to identify sub items in an engineering bill of material(BOM).
- * It is used by product costing to determine how costs are rolled up.
- * It is used by ATP to determine the priority of alternative components.

NEW QUESTION 73

Where can you find the latest in version of the Simplification List for SAP S/4HANA?

Please choose the correct answer.

- * SAP Solution Manager 7.2
- * SAP Help Portal
- * SAP Support Portal
- * SAP Best Practices Explorer

NEW QUESTION 74

What do you use to schedule operations from planned orders so that the production plan can be fulfilled?

- * Demand Planning (DP)
- * Material Requirements Planning (MRP)
- * Capacity Requirements Planning (CRP)
- * Supply Network Planning (SNP)

NEW QUESTION 75

You want to triggering-houseproduction of a semi-finished mater al before a sales order for the corresponding finished good is received. Which planning strategy supports the consumption of planned independent requirements for the semi-finished material?

- * Make-to-order production (20)
- * Planning without final assembly (50)
- * Planning with final assembly (40)
- * Planning at assembly level (70)

NEW QUESTION 76

How can you limit the validity of a bill of material (BOM)? Note: There are 2 correct answers to this question.

- * By plant
- * By material type
- * By period
- * By industry

NEW QUESTION 77

What does the industry sector determine? Note: There are 2 correct answers to this question.

- * Whether a material master field is required, changeable, displayed, or hidden
- * Which transaction you can use to create a new material
- * Which material master views can be maintained
- * Whether material numbers are assigned internally or externally

NEW QUESTION 78

Which material master setting is required to use the repetitive planning table for production with production orders?

- * At least one valid production version must exist on the MRP4 view
- * An overall profile be assigned on the Work Scheduling view
- * The Selection Method must be set to 2 Selection by production version;
- * A repetitive manufacturing profile must be assigned on the MRP4 view

NEW QUESTION 79

Which time elements are part of a routing operation? Note: There are 3 correct answers to this question.

- * Queue time
- * Float before production
- * Pick/pack time
- * Wait time
- * Move time

NEW QUESTION 80

A warehouse manager likes to streamline the goods receipt (GR) process for production orders. Where can you enable the automatic GR? There are 2 correct answers to this question.

- * Confirmation profile
- * Scheduling margin key
- * Operation control key
- * Production scheduling profile

NEW QUESTION 81

You have a scheduling agreement with a vendor. You want classic MRP to automatically create schedule lines in case of material shortage. What must you do? Note: There are 2 correct answers to this question.

- * Set the creation indicator for purchase requisitions on the initial screen of the MRP run.
- * Set the creation indicator for delivery schedule lines on the initial screen of the MRP run.
- * Add the agreement to the source list and mark it for MRP relevance.
- * Add the agreement to the quota arrangement and mark it for MRP relevance.

NEW QUESTION 82

The pegging situation was changed because of an MRP heuristic run. What is a capability of dynamic pegging?

- * It enables the propagation of network alerts across the bill of materials structure
- * It links receipts from an alternative location in case of a shortage in the default location
- * It propagates changed sales order priorities to the pegged planned orders
- * It replaces fixed pegging relationships unless they have been created for stock
