Latest SAP C_S4HDEV1909 First Attempt, Exam real Dumps Updated [Oct-2022] Get the superior quality C_S4HDEV1909 Dumps Questions from VCEPrep. Nobody can stop you from getting to your dreams now. Your bright future is just a click away! **QUESTION 21**

You implement a SELECT statement in ABAP. When do you use the key word FIELDS?

- * When the position of the fields list is after the UNION clause.
- * When the position of the fields list is after the FROM clause.
- * When the position of the fields list is after the GROUP BY clause.
- * When the position of the fields list is after the ORDER BY clause.

QUESTION 22

You are writing an ABAP Managed Database Procedure that contains a SELECT statement. How does client handling work?

Please choose the correct answer.

- * Use sy-mandt
- * Use session_context(ICLIENTI)
- * Use \$session.client
- * Client handling is automatic

QUESTION 23

You edit a behavior implementation class of a draft-enabled BOPF Business Object. You need to distinguish between a new draft instance and an edit draft instance. Which property of the node instance do you evaluate?

- * ActiveUUID
- * IsActiveEntity
- * DraftEntityOperationCode
- * HasActiveEntity

QUESTION 24

Which OData option do you use to access the data model of the service?

Please choose the correct answer.

- * \$select
- * \$expand
- * \$format
- * \$metadata

QUESTION 25

You are creating an enhancement implementation using key user extensibility. Which of the following can you do in the web-based ABAP editor? Note: There are 3 correct Answers to this question.

- * Create filter conditions.
- * Assign your implementation to a transport request.
- * Modularize your code using custom libraries.
- * Test your custom logic.
- * Directly access SAP database tables.

QUESTION 26

How could you replace the statement CONCATENATE a b INTO c.?

There are 2 correct answers to this question.

- * c = |{ a }{ b }|.
- * c = |a&&b|.
- * c = a& b.
- * c = a && b.

QUESTION 27

You use the following expression to address the internal table gt_flights: gs_flight = gt_flights[carrid = IXXI connid = I9999]. There is NO table entry with the specified key.

What is the result of the statement?

Please choose the correct answer.

- * gs_flight is initialized. The system triggers an exception.
- * gs_flight retains its previous contents. The system triggers an exception.
- * gs_flight retains its previous contents. The system sets sy-subrc to 4.
- * gs_flight is initialized. The system sets sy-subrc to 4.

QUESTION 28

You want to define a CDS-based BOPF Business Object that consists of a root node (ZI_DocumentTP) and a child node (ZI_ItemTP). Which annotation is mandatory in the data definition of CDS view ZI_ItemTP?

Please choose the correct answer.

- * @ObjectModel.writeActivePersistence: I…I
- * @ObjectModel.transactionalProcessingEnabled: true
- * @ObjectModel.association.type: [#TO_COMPOSITION_CHILD]
- * @ObjectModel.compositionRoot: false

QUESTION 29

You are writing an ABAP Managed Database Procedure that contains a SELECT statement. How does client handling work?

- * Use sy-mandt
- * Use session_context(‘CLIENT’)
- * Use \$session.client
- * Client handling is automatic

QUESTION 30

SAP enabled key user extensibility for a SAP Fiori application. The application accesses a database table that you extended with an append structure in the customer namespace. You want to use key user extensibility to create input fields on the SAP Fiori UI that correspond to the custom database fields.

Which of the following steps are mandatory?

There are 3 correct answers to this question.

- * Append the custom database fields to the extension include structure provided by SAP.
- * Activate the custom database fields using the transaction Extensibility Registry (SCFD_REGISTRY).
- * Redefine the OData service used by the SAP Fiori app in transaction SAP Gateway Service Builder(SEGW)to add the custom database fields.
- * Enable the usage of the custom database fields in the Custom Fields and Logic app.
- * Enable the custom database fields for usage in SAP Fiori apps using the transaction Enable Fields for Use in the Custom Fields and Logic (SCFD_EUI) app.

QUESTION 31

What are advantages of the expression-based syntax in ABAP compared to the statement-based syntax?

There are 2 correct answers to this question.

- * It uses fewer helper variables
- * It is more concise
- * It is faster
- * It causes fewer exceptions

QUESTION 32

Which of the following are extensibility apps from the Extensibility Business Catalog? Note: There are 3 correct Answers to this

question.

- * Custom Database Fields
- * Data Source Extensions
- * Custom CDS Views
- * Custom Fields and Logic
- * Configure Software Packages

QUESTION 33

You develop an SAP Fiori app in a specific solution area. Where do you define tiles and target mappings for the app?

Please choose the correct answer.

- * In a Technical Catalog
- * In a Business Role
- * In a Business Catalog Group
- * In a Business Catalog

QUESTION 34

In your system landscape, there is a development system DEV and a central check system CHK. Which of the following describes the developer scenario of remote checks with ABAP Test Cockpit (ATC)?

Please choose the correct answer.

- * A developer logs on to system CHK and invokes a check in system DEV.
- * A developer logs on to system CHK and checks objects from system DEV.
- * A developer logs on to system DEV and invokes a check in system CHK.
- * A developer logs on to system DEV and checks objects from system CHK.

QUESTION 35

You have written the following code: START-OF-SELECTION. LOOP AT itab INTO DATA(line). * ENDLOOP. The system creates a variable called Line. When is it created and when can you address it?

Please choose the correct answer.

- * It is created when the LOOP statement is processed. You can access it only within the loop.
- * It is created at the beginning of the program. You can access it any time after the declaration.
- * It is created when the LOOP statement is processed. You can access it any time after the declaration.
- * It is created at the beginning of the program. You can access it only within the loop.

QUESTION 36

You plan to migrate an SAP ERP system to SAP S/4HANA. Which of the following tasks are recommended but NOT mandatory?

There are 2 correct answers to this question.

- * Custom code evaluation
- * Performance tuning
- * SAP S/4HANA checks
- * Functional adaption

QUESTION 37

When creating CDS-based BOPF Business Objects, the system generates several additional repository objects.

Among those objects are objects in the ABAP Dictionary.

Which types of ABAP Dictionary objects are generated?

There are 2 correct answers to this question.

- * Structures
- * Data Elements
- * Database Views
- * Table Types

QUESTION 38

Which data transfer formats are available in SAP Gateway? Note: There are 2 correct Answers to this question.

- * REST (Representational State Transfer)
- * JSON (JavaScript Object Notation)
- * HTML (Hypertext Markup Language)
- * XML (Extensible Markup Language)

QUESTION 39

Which of the following ways can you use to address input parameter X in the CDS view definition? Note:

There are 2 correct Answers to this question.

- * :X
- * @X
- * @parameters.X
- * \$parameters.X

QUESTION 40

Which of the following features are part of the new syntax for Open SQL? Note: There are 2 correct Answers to this question.

- * Comma-separated column list
- * Blank-separated column list
- * ABAP variables escaped with :
- * ABAP variables escaped with @

QUESTION 41

In a central hub deployment, which protocol is used to communicate between front-end and back-end server?

- * InA
- * OData
- * RFC
- * HTTP

QUESTION 42

Which of the following Open SQL statements are syntactically correct in release 7.50? Note: There are 3 correct Answers to this

question.

- * SELECT FROM sbook . FIELDS carrid, connid, loccuram, loccurkey . INTO TABLE @lt_booking . WHERE customid = @lv_customer.
- * SELECT carrid, connid, loccuram, loccurkey . FROM sbook . INTO TABLE @lt_booking . WHERE customid = @lv_customer.
- * SELECT carrid connid loccuram loccurkey. FROM sbook. INTO TABLE lt_booking . WHERE customid = lv_customer.
- * SELECT carrid connid loccuram loccurkey . FROM sbook . WHERE customid = lv_customer . INTO TABLE lt_booking.
- * SELECT FROM sbook. FIELDS carrid, connid, loccuram, loccurkey . WHERE customid = @lv_customer . INTO TABLE @lt_booking.

QUESTION 43

The root-node of a CDS-based business object is based on CDS View ZMY_VIEW. The persistent data is stored in the database table ZMY_TABLE. At least one key field of ZMY_TABLE has a different name in CDS View ZMY_VIEW. Which kind of repository object is needed to map the fields of ZMY_VIEW to the fields of ZMY_TABLE?

- * SQL View
- * Database View
- * Structure Type
- * Global Class

QUESTION 44

Which of the following Open SQL statements are syntactically correct in release 7.50?

There are 3 correct answers to this question.

- * SELECT FROM sbook . FIELDS carrid, connid, loccuram, loccurkey . INTO TABLE @lt_booking .

WHERE customid = @lv_customer.

- * SELECT carrid, connid, loccuram, loccurkey . FROM sbook . INTO TABLE @lt_booking . WHERE customid = @lv_customer.
- * SELECT carrid connid loccuram loccurkey. FROM sbook. INTOTABLE lt_booking . WHERE customid = lv_customer.
- * SELECT carrid connid loccuram loccurkey . FROM sbook . WHERE customid = lv_customer.

INTOTABLE lt_booking.

- * SELECT FROM sbook. FIELDS carrid, connid, loccuram, loccurkey . WHERE customid

=@lv_customer. INTOTABLE @lt_booking.

QUESTION 45

You want to define an ABAP Managed Database Procedure (AMDP) . Which are requirements in the definition part of the class?

Note: There are 2 correct Answers to this question.

- * The AMDP method has at least one exporting parameter.
- * The AMDP method is defined as a static method.
- * The class implements interface if_amdp_marker_hdb.
- * All parameters of the AMDP method are passed by value.
