SAP C_S4CDK_2022 Dumps - The Sure Way To Pass Exam [Q21-Q43

SAP C_S4CDK_2022 Dumps - The Sure Way To Pass Exam

C_S4CDK_2022 Exam Questions (Updated 2022) 100% Real Question Answers

NO.21 What is the role of the Jenkins server in the SAP Cloud SDK Continuous Delivery Toolkit?
* It is the main component that runs the build pipeline.
* It is responsible for building the backend components.
* It allows projects to be deployed to various SAP Cloud Platform accounts.
* It starts the Cx server on the host or virtual machine.

NO.22 Which type of test is used in the first iteration of verifying that your software modules, such as classes, behave as expected?
* Smoke test
* Exploratory test
* Unit test
* End-to-end test

NO.23 Which of the Integration techniques used by side-by-side applications allows you to only read data?
* Public APIs like oDATA, REST and SOAP APIs
* Customer enabled oDATA service for released CDS views

* BAPIs via SAP Cloud SDK or RFC using SAP Cloud Connector
* Customer enabled oDATA service for Custom Business Objects

NO.24 Which activities can you perform with the Import Software Collection app? Note: There are 2 correct Answers to this question.
* Import a specific software collection version to the production system.
* Apply changes to software collections during the preprocessing stage of the import process.
* View potential business interruptions affected by the import process.
* Roll back software collections that were imported previously.

NO.25 Which authentication and connection activity does the SAP Cloud SDK handle automatically?
* It creates a communication arrangement with the user ID and password in the SAP S/4HANA Cloud system.
* It determines the configuration by consuming the destination service on SAP Cloud Platform.
* It exchanges the SAML assertion with the identity provider.
* It manages user accounts and provides Single Sign-On.

NO.26 In the figure shown, what is the role of the manifest-perf.yml file?

* It configures the stage-level values for specific stages.
* It configures the credentials that will be used to connect to the Cloud Foundry environment account.
* It configures the servers where the performance tests are carried out.
* It configures the default values for test steps.

NO.27 What are important features of multi-tenancy architecture? Note: There are 3 correct Answers to this question.
* Shared access management between different tenants
* Dedicated technical resources for each tenant
* Shared software between different tenants
* Costs savings for hosting and operating the software
* Separation of data for each tenant

NO.28 You set up the business authorizations for your business applications. What do you do first to secure an app?
* Define a role.
* Assign a role collection to the user.

* Add the role template to a role collection.
* Define role templates containing scope(s).

NO.29 You use the Nest Framework and Visual Studio Code to develop an extension application. Which activities can you perform in the development environment? Note: There are 2 correct Answers to this question.
* Automatic re-build of a TypeScript program when the source code is modified.
* Run the Java program and make it stop at breakpoints.
* Automatic re-deploy of a JavaScript program when the source code is modified.
* Run the JavaScript program and make it stop at breakpoints.

NO.30 Which tests are run in parallel to performance tests in the SAP Cloud SDK Pipeline?
* Backend integration tests
* Quality checks
* Backend unit tests
* End-to-end tests

NO.31 A section of code failed multiple times in a short timeframe. Which ErpCommand feature allows you to circumvent this section of code?
* Fallbacks
* Bulkheads
* Circuit breakers
* Thread-pools

**NO.32** In which SAP Activate phase is the project initiated and planned?
* Realize
* Prepare
* Discover
* Explore

NO.33 What is Elastic Stack?
* An orchestration service that uses elastic load balancers.
* A group of open source products designed to collect logs from multiple services.
* A cloud computing architecture that allows dynamic resource scaling.
* An open source automation server, helping to automate the parts of software development.

NO.34 What is the role of the SAP Cloud Platform Enterprise Messaging service in the diagram?

* It enables the design and execution of business processes with SAP S/4HANA Cloud.

* It provides out-of-the-box integration with SAP applications such as SAP S/4HANA Cloud.
* It provides an API for the sending and the receiving application to communicate with each other.
* It communicates directly with the Enterprise Event Management service using HTTPS.

NO.35 Which service enables users to adapt and personalize their user interface at runtime?
* SAP Cloud Platform Mobile Services
* SAP S/4HANA Cloud infrastructure service
* SAP Smart Business cockpits
* SAPUI5 flexibility service

NO.36 The SAP Cloud SDK Continuous Delivery Toolkit consists of the SAP Cloud SDK Pipeline and the codified infrastructure needed to run this pipeline. What does the codified infrastructure use to run the SAP Cloud SDK Pipeline? Note: There are 2 correct Answers to this question.
* It uses open source automation tools for integration testing.
* It uses build tools such as Maven and Node Package Manager (npm).
* It uses plugins for development IDE, such as Eclipse and IntelliJ.
* It uses Docker images to run Jenkins.

NO.37 What is the key element of reactive systems in the highly distributed environment of side-by-side extensions?
* Synchronous interaction between a browser and a system
* Synchronous API communication between systems
* Secure inbound and outbound communication between systems
* Asynchronous message-driven communication between systems

NO.38 Which of the following are benefits of using the OData Virtual Data Model of the SAP Cloud SDK? Note:

There are 3 correct Answers to this question.
* Type safety for functions
* Database procedures provided out of the box
* Auto completion of function names and properties
* Commonly used SQL query technology
* Easy access to create, update, and delete operations

NO.39 How can you extend an app with custom logic using in-app extensions? Note: There are 2 correct Answers to this question.
* Implement custom logic at predesignated SAP enhancement points.
* Ascertain that the app is extensible.
* Apply modifications to the copy of the original app.
* Assign new roles and catalogs to the extended app.

NO.40 A user requires access to the Key User extension Apps in SAP S/4HANA Cloud. Which business catalog and business role must you assign?
* Business catalog: SAP_BC_CORE_APP Business role: SAP_BR_ADMINISTRATOR
* Business catalog: SAP_BC_CORE_COM Business role: SAP_BR_ADMINISTRATOR_DPR
* Business catalog: SAP_CORE_BC_EXT Business role: SAP_BR_ADMINISTRATOR_DPR
* Business catalog: SAP_CORE_BC_EXT Business role: SAP_BR_ADMINISTRATOR

NO.41 In which In-App extensions can you directly manage the usage of Custom Fields for the Apps enabled for key user extensions? Note: There are 3 correct Answers to this question.
* Custom Tile
* Enabled Business scenarios

* Custom Analytics
* Custom Forms
* Custom Communication Scenarios

NO.42 What programming models can be used to implement side-by-side extensions in the Cloud Foundry environment of SAP Cloud Platform? Note: There are 2 correct Answers to this question.
* Java
* Node.js
* SQL
* ActionScript

NO.43 How do you achieve a zero-downtime deployment using the SAP Cloud SDK Pipeline?
* Use the Maven archetype to generate the project.
* Provide configuration details in the pipeline_config.yml file.
* Use the Docker image optimized for zero-downtime deployment.
* Include the Hystrix library to ensure resilience.
