

2022 Latest H13-531_V2.0 Exam Dumps Recently Updated 827 Questions [Q66-Q86]

2022 Latest H13-531_V2.0 Exam Dumps Recently Updated 827 Questions
Huawei H13-531_V2.0 Real 2022 Braindumps Mock Exam Dumps

NO.66 When the host in Huawei FusionSphere uses a GE network card, it is recommended to separate the management, service, and storage networks and use a separate physical network for each.

- * TRUE
- * FALSE

NO.67 In the ManageOne operation plane, VDC supports the management of multiple regions and AZs, and supports the application of resources across regions for the same project.

- * True
- * False

NO.68 When the FusionStorage Block is connected to the FusionCompute, you need to create a volume on the FusionStorage Block before adding data storage to the FusionCompute.

- * TRUE
- * FALSE

NO.69 During the operation and maintenance process of FusionAccess, the operation and maintenance personnel need to analyze and locate the fault phenomenon, and correspond the following fault phenomena to their possible fault causes:_____

The primary and secondary databases are out of sync;The HA service of the database server is abnormal

The primary and secondary databases are out of sync;the database server is abnormal

The virtual machine state is abnormal;- the time of the virtual machine and the HDC server are out of sync

The virtual machine state is abnormal;- LisOftdcs in the virtual machine registry, the value is modified

NO.70 How many pairs of vLBs are generally deployed to meet the performance requirements of a desktop cloud office?

- * 1
- * 2
- * 3
- * 4

NO.71 Installing Tools can improve the IO processing performance of the virtual machine.

- * TRUE
- * FALSE

NO.72 If a storage device is configured with 8 1Gb/s iSCSI storage network cards, and the network bandwidth loss is 15%, which of the following methods can calculate the effective bandwidth (Mb/s) of the storage device?

- * $8 \times 1024 \times 0.15$
- * $8 \times 1024 \times 1024 \times 0.15$
- * $8 \times 1024 \times (1 - 0.15)$
- * $8 \times 1024 \times 1024 \times (1 - 0.15)$

NO.73 When the company chooses the Huawei desktop cloud disaster recovery solution, it is hoped that the solution can perform disaster recovery on user data in the desktop. Which of the following disaster recovery solutions is more suitable?

- * GSLB+NAS disaster recovery solution
- * Client-side autonomous services disaster recovery
- * WI redirection disaster recovery
- * GSLB service disaster recovery

NO.74 Which of the following descriptions about FusionCompute snapshots is incorrect?

- * When the virtual machine is being live migrated, the virtual machine memory snapshot operation cannot be performed
- * The pressure on disk 10 will cause the failure to create a consistent snapshot. It is recommended to create a consistent snapshot when the pressure on disk 10 is low.
- * A virtual machine can create multiple memory snapshots. When one snapshot is used to restore the virtual machine, it will not affect other snapshots
- * When the virtual machine system disk data storage type is NAS storage, it supports creating memory snapshots

NO.75 Which component can achieve load balancing by deploying vLB components?

- * ITA
- * HDC
- * WI
- * vAG

NO.76 In the FusionCompute distributed switch, what port does the virtual machine rely on to communicate with the external

network?

- * Port Group
- * Uplink
- * Storage Interface
- * Mgnt

NO.77 In HUAWEI Desktop Cloud, which of the following are the factors in the performance triangle model that affects virtual machine density? (Multiple choice)

- * capacity
- * Density
- * Workload
- * QoS

NO.78 A company hopes to use Huawei Desktop Cloud to replace traditional PC desktops. Users include 3D animation, video producers, etc. Which of the following desktops is more suitable?

- * GPU Desktop
- * Linked-clone desktops
- * Full memory desktop
- * Full copy desktop

NO.79 In the network planning of Huawei Desktop Cloud Solution, which network plane does not need to be planned?

- * Management network
- * Business Network
- * Storage Network
- * HDP Network

NO.80 After the user logs in to the FusionCompute virtual machine using VNC, it is found that the operation cannot be performed normally, and there is a stuck phenomenon (for example, the file cannot be opened, etc.). This phenomenon may be caused by which of the following reasons?

- * The management link is unstable
- * The storage link is unstable
- * The service link is unstable
- * Virtual machine corruption

NO.81 A company needs to build a FusionCompute system with 200 servers. Which building method is recommended?

- * VRM adopts virtualization deployment, tools install CNA and install VRM.
- * VRM is deployed by virtualization, CNA is installed manually, and VRM is installed by tools.
- * VRM adopts physical deployment, tools install CNA, and VRM is manually installed.
- * The VRM is deployed physically, and the CNA and VRM are manually installed.

NO.82 Which of the following statements are correct regarding the difference between a domain and an organizational unit OU? (Multiple choice)

- * Both OUs and domains can set Group Policy.
- * OUs can exist in domains, and domains can also be in OUs.
- * Both OUs and domains can hold AD objects.
- * The user is only logged in to the domain, not the OU

NO.83 The customer storage system needs to be upgraded, and an existing virtual machine is bound to the host. Which of the following technologies is recommended to implement an in-game storage system?

- * Virtual machine live migration changes the host.

- * Virtual machine live migration changes hosts and datastores.
- * Unable to meet demand.
- * Live migration of virtual machines to data storage.

NO.84 Using Huawei BCmanager eBackup for data backup and using the LAN-Base networking mode, when a user backs up a virtual machine, what does the backup agent do?

- * Issue backup tasks to VRM or vcenter
- * Receive the virtual machine snapshot sent from the CAN host
- * Distribute backup tasks to production storage
- * Receive backup data from production storage

NO.85 What is the system packaging tool used to completely replicate virtual desktops?

- * Xmind
- * Sysprep
- * CMD
- * WinRAR

NO.86 FusionStorage Block is a disk that cannot be configured with RAID. The RAID information must be deleted before FusionStorage Block can identify these disks.

- * TRUE
- * FALSE
