# Prepare PEGAPCSA86V1 Exam Questions [2022 Recently Updated Questions [Q14-Q33

Prepare PEGAPCSA86V1 Exam Questions [2022 Recently Updated Questions Give push to your success with PEGAPCSA86V1 exam questions Q14. You create an application for employees to submit timesheets. Employees enter work, vacation, and sick time for a particular week.

On the entry form, employees see a summary of the total hours entered.

After the employee submits the timesheet, the application displays remaining vacation and sick time for the employee.

To configure the form where users enter hours, select the best configuration option to calculate the total hours for the week.
* Use a When rule. When the value of any work, vacation, or sick time changes, the total hours change.
* Use declarative processing. When the value of any work, vacation, or sick time changes, the total hours change.
* Use procedural processing. When the value of any work, vacation, or sick time changes and the user submits the form, the total hours change.
* Use a data transform. When the user enters the form, the data transform determines the sum of the work, vacation, and sick time properties.

Q15. You are implementing a Ul form collecting job applicant information. Users must provide

values to certain fields before submitting the form.

Which configuration adds asterisks to indicate the mandatory fields on the form?
* Use multiple Validate rules for each mandatory field
* Use an Edit Validate rule to verify if each of the mandatory properties has a value
* Use a Validate rule to verify the mandatory fields have a value
* Configure the mandatory fields as Required in the section rule

Q16. A form listing nearby restaurants has four columns:

* Restaurant name

* Restaurant location

* Thumbnail image of the seating area

* Make reservation (check box)

You want to ensure that users have the information they need to make a reservation regardless of screen size.

When viewed on a small screen, you do not need to display images.

What three configuration steps do you take to support this requirement? (Choose three.)
* Set the importance of the Make reservation column to Primary.
* Set the importance of the Restaurant name column to Primary.
* Set the importance of the image column to Other.
* Set the importance of the image column to Secondary.
* Set the importance of the Restaurant location and Make reservation columns to Secondary.
* Set the importance of the Restaurant name and Make reservation columns to Primary.

Q17. A bookseller maintains a database of more than 10,000 book titles. You have been asked to configure a form that a allow users to select a book by title .

How do you configure the form?
* Add a drop-down control arid source the data from the property value used in the control.
* Add a drop-down control and Source the data using a data page. C Add an autocomplete control and Source the data using a data page.
* Add an autocomplete control and source the data from the clipboard work page.

Q18. You configure a service level to adjust assignment urgency to 100 when the goal interval lapses.

How does assignment urgency impact the deadline and passed deadline intervals?
* Urgency value remains at 100, but other service level processing continues.
* Urgency value continues to increment as configured.
* Service level processing is halted until the assignment is completed.
* The user is notified that the maximum urgency has been reached.

Q19. You have created a new report that contains a list of employees, hire dates, and managers. You have been asked to display each manager in a row. Beneath each manager row, you must list the manager’s employees and their hire dates .

How do you support this request?

* Summarize the manager column
* Sort the manager column
* Group the manager column
* Filter the manager column

Q20. DRAG DROP

From the left, drag each report into the corresponding report type on the right.

Business Reports

The number of customer support
request cases created per week

Average duration and timeliness per
assignment

Process Reports

Top 10 merchants with highest
percentage of fraud cases

Total customer inquiry cases per state
per product line

Business Reports

Top 10 merchants with highest percentage of fraud cases

The number of customer support request cases created per week

Total customer inquiry cases per state per product line

Average duration and timeliness per assignment

Process Reports

Top 10 merchants with highest percentage of fraud cases

The number of customer support request cases created per week

Total customer inquiry cases per state per product line

Average duration and timeliness per assignment

Q21. An order fulfillment case type allows a customer to update user profile information during the order placement stage.

The user profile consists of the following three pages:

* Account ID and password

* Customer contact information

* A list of open orders with status of each order

How do you configure the case type to allow customers to update any of the user profile pages at any time during case processing?
* Add a set of optional actions to the case workflow.
* Add an alternate stage to the case life cycle.
* Add an optional process to the case workflow.
* Add a button for each profile page to each assignment.

Q22. A reservation process allows customers to reserve a flight, hotel room, and rental car as part of a travel itinerary.

Which configuration displays a check box to allow users to select travel insurance only if the itinerary includes a flight?
* A visible when condition applied to the check box
* An action set applied to the check box
* A declare expression configured for forward chaining
* A validate rule applied to the flow action

Q23. In a claims application, customers can file home insurance claims. Each claim contains a list of items of loss.

Depending on circumstances, some claims are investigated for potential fraud in parallel to the actual claim process.

Which two entities would you model as case type? (Choose two.)
* Fraud investigation
* Claim
* Customer
* Items of loss

Q24. Which business need do you address through delegation?
* A service representative must attach the appropriate form when emailing a customer.
* A risk officer wants to adjust the income threshold for automobile loans.
* A care supervisor wants to authorize a second opinion for an insurance claim.
* A general manager must approve catering proposals that exceed EUR5000.

Q25. What are the minimum components of a user interface (Ul) action set?
* Two actions and one event
* One action, one event, and one condition
* One action and one event
* One action and one condition

Q26. In designing your application, you want to apply consistent visual styles to all parts of the application.

How do you meet this requirement?
* Specify a skin in the application rule.
* Apply styles to the screen layout.
* Use the Live Ul tool to select the skin rule.
* Specify a skin in the harness rule.

Q27. A restaurant has a case type that allows customer to book the dining room for events. Customers provide basic information including party size and indicate whether they want the restaurant to cater the event.

If the catering is not requires are given a rental rate quote.

If customers indicate that want the restaurant to cater the event, they must provide menu preferences and schedule an appointment to do menu before they are given a quote.

Which two options would you use to configure the case type to achieve the requested behavior? (Choose Two.)
* Create a check box for customer to indicate whether they want the restaurant to cater the event. Create a selection with the menu preferences and scheduling feature that has a Visible when condition.
* Create a check box for customer to indicate whether they want the restaurant to cater the event. Add a decision shape that evaluates whether the customer checks the box.
* Create a process for customers to indicate menu preference and schedule the menu testing appointment. Add the process as a case-wide optional action.
* Create a process for providing menu preferences and scheduling the menu appointment. Create a parallel process for providing the customer with the rental rete quote.

Q28. A requirement states: The tax identification number must contain 10 digits .

How do you configure the field to support this requirement?

* Set the minimum and maximum values to “10” in a text field-
* Use an edit validate rule that validates the tax identification number pattern.
* Use a decimal property type and make the field required.
* Configure a validate rule to test the tax identification number pattern.

Q29. Which two conditions do you test with a unit test? (Choose two.)
* A property value is set correctly by a data transform.
* An application is successfully migrated to a test system.
* A data page populates without any errors.
* An application displays user views for 20 users within three seconds.

Q30. What is the relationship between pyWorkPage and case data?
* pyWorkPage timestamps all the data generated while creating and processing a case.
* pyWorkPage stores all the data pages generated when a case resolves.
* pyWorkPage stores all the data generated while creating and processing a case.

Q31. A customer views a product available in multiple color options. The customer must select only one color for each product.

Which Ul control allows a developer to present the user with all color choices at once, without prompting or clicking, while ensuring that the user can only select one of the color options?
* Radio buttons
* Text input
* Drop-down
* Check box

Q32. While testing a form, you need to verify the contents of a data page in memory .

Which tool do you use to view the current contents of the data page?
* The Clipboard tool
* Case Designer
* The Data Explorer
* Live Ul

Q33. You are configuring an external data source using the Integration Designer. You have the REST, Dev, Stage, and Prod endpoint URLs, and a name for the data source .

What other information do you need to configure the external data source?
* The name of the database where the source data is stored
* The data views using the external data source
* A plan for mapping the data and REST response fields
* A backup endpoint URL if the configured URL refuses to connect
