EC-Council 712-50: Prerequisites

The target audience for this exam includes the CISOs, IT directors, system administrators, IT risk managers, and professionals who want to validate their skills in the domain of the certification. The potential candidates for this test must attend the official training for the EC-Council Information Security Manager certificate. It is also required that they earn the needed experience before attempting the exam.

Those students who choose to go the route of the self-study preparation option will be required to fill out and submit the CCISO eligibility application form. They are also required to pay the processing fee and, once their application has been approved, they can proceed to purchase the exam voucher and schedule the test. The applicants who opt for the official course can enroll for in-person or online training. After completing it, you only have to submit the certificate of completion as well as the eligibility application to obtain the exam voucher.

QUESTION 186

When managing an Information Security Program, which of the following is of MOST importance in order to influence the culture of an organization?
* An independent Governance, Risk and Compliance organization
* Alignment of security goals with business goals
* Compliance with local privacy regulations
* Support from Legal and HR teams

QUESTION 187

An organization is looking for a framework to measure the efficiency and effectiveness of their Information Security Management System. Which of the following international standards can BEST assist this organization?
* International Organization for Standardizations – 27004 (ISO-27004)
* Payment Card Industry Data Security Standards (PCI-DSS)
* Control Objectives for Information Technology (COBIT)
* International Organization for Standardizations – 27005 (ISO-27005)

QUESTION 188

Scenario: Critical servers show signs of erratic behavior within your organization’s intranet. Initial information indicates the systems are under attack from an outside entity. As the Chief Information Security Officer (CISO), you decide to deploy the Incident Response Team (IRT) to determine the details of this incident and take action according to the information available to the team. During initial investigation, the team suspects criminal activity but cannot initially prove or disprove illegal actions.

What is the MOST critical aspect of the team’s activities?
* Regular communication of incident status to executives
* Preservation of information
* Eradication of malware and system restoration
* Determination of the attack source

QUESTION 189

An organization has implemented a change management process for all changes to the IT production environment. This change management process follows best practices and is expected to help stabilize the availability and integrity of the organization’s IT environment. Which of the following can be used to measure the effectiveness of this newly implemented process:
* Number of change orders rejected
* Number and length of planned outages
* Number of unplanned outages
* Number of change orders processed

QUESTION 190

During the course of a risk analysis your IT auditor identified threats and potential impacts. Next, your IT auditor should:
* Identify and assess the risk assessment process used by management.
* Identify and evaluate existing controls.
* Identify information assets and the underlying systems.
* Disclose the threats and impacts to management.

QUESTION 191

A CISO wants to change the defense strategy to ward off attackers. To accomplish this the CISO is looking to a strategy where attackers are lured into a zone of a safe network where attackers can be monitored, controlled, quarantined, or eradicated.
* Moderate investment
* Passive monitoring
* Integrated security controls
* Dynamic deception

QUESTION 192
