C_SEN_2011 Exam Certification Details:

Cut Score:64%Duration:180 minsExam:80 questionsLevel:AssociateSample Questions: SAP C_SEN_2011 Exam Sample Question

NO.37 Why does a SAP Enable Now Manager, HANA edition on-premise require a two-tier infrastructure?

Choose the correct answer.

- * The SAP HANA database runs on Windows and Apache Tomcat run on Linux.
- * Apache Tomcat must be installed as a standalone server.
- * The SAP HANA database runs on Linux and Apache Tomcat on Windows.
- * The SAP HANA database requires a 64-bit system and Apache Tomcat 32-bit system.

NO.38 Your customer wants to provide access to content using deep links. What must you consider? Note:

There are 2 correct answers to this question.

- * A deep link including ../pub/..forces authenticated access.
- * A deep link including ../auth/..forces authenticated access.
- * A deep link including ../wa/..forces anonymous access.
- * A deep link including ../~tag/published/..works without forcing.

NO.39 A customer wants to use Desktop Assistant for a non-SAP target application that is not listed in the Product Availability Matrix (PAM) and asks you whether this is possible. What do you reply? Choose the correct answer.

- * Because the application is not listed in the PAM, Desktop Assistant cannot be rolled out for this application.
- * The PAM shows the limitations for SAP applications. Non-SAP applications are supported out-of-the- box.
- * Desktop Assistant can be rolled out for an application, but will support the application context only.
- * Because the application is not listed in the PAM, it is not officially supported. You must evaluate whether the application will work.

NO.40 Your customer wants to store all SAP Enable Now documentation within SAP Solution Manager. What do you tell the customer? Choose the correct answer.

- * The integration is done from within Manager via scheduled synchronization.
- * The integration is possible between Producer and SAP Solution Manager 7.2 but will only provide deep links to the documentations.
- * The integration is possible with any version of SAP Solution Manager on both client side and server side.

NO.41 Your customer rolled out a new version of Microsoft Office. They want to use performance support to train end users on new Office features. What does SAP recommend you do?

- * Use Web Assistant.
- * Use context help to explain all of the Office UI elements.
- * Deliver Desktop Assistant with guided tours for all new Office features.
- * Start with an easy scenario by using Desktop Assistant with simulations.

NO.42 You installed the SAP Enable Now Manager on premise on an Apache Tomcat server. What do you do next? Note: There are 2 correct answers to this question.

- * Change the values for the memory pool to match performance requirements.
- * Configure the server XML files to match security and performance requirements.
- * Send the Tomcat administrator password to SAP support.
- * Download and add the additional Java libraries that are needed for Manager, SQL option.

NO.43 What are the characteristics of playback settings? Note: There are 2 correct answers to this question.

- * They are saved in the trainer resource.
- * They can be modified by end users.
- * When they are appended to the URL, they override default settings.
- * They can be set on project level by using the Project Override settings.

NO.44 You want to restore an object to a previous version. What must you consider?

- * All versions lower than the reverted version are deleted.
- * Restoring a version is only possible in Instant Producer.
- * A copy of the to be restored object becomes a new version.

NO.45 A customer wants to implement SAP Enable Now, cloud edition. What technical prerequisites do you have to consider?

Note: There are 2 correct answers to this question.

- * All customer users need to be synchronized to the Identity Authentication service tenant before the implementation.
- * The customer's firewall must allow access to SAP Cloud Platform from any end user computer.
- * The Adobe Flash plug-in has to be installed on every end user computer.
- * For authoring or consuming electronic performance support content using Desktop Assistant, either the SAP Enable Now App Launcher or a suitable Java runtime need to be installed on every end user computer.

NO.46 You want to ensure reliable re-recognition in Web Assistant. What are the recommended properties of UI control attributes?

Note: There are 2 correct answers to this question.

- * A value needs to be unique.
- * A value needs to start with an underscore.
- * A value needs to contain a number.
- * A value needs to be persistent.

- * Product name
- * Protocol
- * Framework ID
- * Product version
- * System

NO.48 In the case of a manual login to Manager, what should you consider regarding the user names and passwords?

- * User names and passwords are always manually created.
- * User names and passwords must have special characters.
- * User names and passwords can come from external identity providers.
- * User names and passwords must be imported via Excel before use.

NO.49 A customer uses SAP S/4HANA and edited the SAP default Web Assistant content. The system will be upgraded to the latest version soon. What must the customer do to still see both the default SAP content and their own content?

- * Add the new SAP S/4HANA version to the Web Assistant Context for all Web Assistant projects.

- * Add the new SAP S/4HANA version to the Web Assistant context for the default SAP content.
- * Change the server address for the SAP default content server.
- * Add the new SAP S/4HANA version to the Keywords property of the Web Assistant project.

NO.50 What actions are possible with hidden objects in the project explorer? Note: There are 2 correct answers to this question.

- * Link to the hidden object and open it in the library.
- * Create an object reference that is visible.
- * Define a time range for the object to be hidden.
- * Use the hidden objects to generate documents.

NO.51 What is an advantage of using Object Visibility in book pages? Choose the correct answer.

- * To reduce the total number of actions that must be maintained
- * To display groups of objects.
- * To show more than one object with a single action
- * To fade in or out instead of only showing or hiding objects.

NO.52 You have exported one translation file. You see that one bubble object that you want to translate is NOT on the file. What should you do to have it on the exported file? Choose the correct answer.

- * Activate the Interactive Mode option in the bubble properties.
- * Check the translate manually flag.
- * Add `“_Translate”` to the end of the object name.
- * Deactivate the Show in Document option in the bubble properties.

NO.53 How can you provide a deeplink to published content? Note: There are 2 correct answers to this question.

- * By changing the view in the Manager from Without Tag to Published and copying the Start Link from selected content
- * By defining the web server's URL as a start link prefix and copying the published start link property
- * By selecting content in the Project Explorer of the Manager and copying the URL in the address bar of the browser
- * By activating Show UID in the Producers' View menu and copying the UIDs as a deeplink for the published content

NO.54 What is the function of the Refresh Workarea and All Objects option in Producer? Note: There are 2 correct answers to this question.

- * Refreshes the workarea cache.
- * Applies changes made at the file system level to the local workarea.
- * Updates Manager with all changes made at the file system folder level.
- * Downloads recent changes from Manager.

NO.55 What are characteristics of sustainable knowledge production? Note: There are 3 correct answers to this question.

- * Multi-modality
- * Maintainability
- * No references
- * Generic library views
- * No redundancies

NO.56 You have created multiple references for an object in your workarea structure. You would like an overview of how many references you have created and where they are located. How does the Producer support this requirement? Note: There are 2 correct answers to this question.

- * In the Reference Tree and Reference List, you can jump directly to a linked object in the tree.
- * Numbers displayed in front of the object indicate the number of references.
- * Objects referenced multiple times have a different color in the Project Explorer tree.
- * References are automatically displayed in the Description field of the object.

NO.57 Which file exists for all SAP Enable Now objects at the file system level?

- * The entity descriptor entity.xml
- * The preview.png
- * The reference to the workarea
- * The slide.xml
