Dec-2022 ACP-610 Study Material, Preparation Guide and PDF Download Free ACP-610 Certification Sample Questions with Online Practice Test NEW QUESTION 34

As the project administrator for the DEV project you are also responsible for managing the team's board and various filters being used on the team's dashboard. They asked you to add a new status called Testing to the project's workflow.

What two other changes might be required? (Choose two.)

- * The filters need to be updated to reflect the changes.
- * The workflow screens need to be updated to reflect the new status.
- * The new status needs to be mapped to a column on the board.
- * The workflow has to be mapped to the issue types used in the project.
- * Project permissions need to be updated so users can transition to the new status.

NEW QUESTION 35

In my project, I can create issues and assign them to other users.

However, the other users are not able to assign issues to me.

What are two possible reasons for this? (Choose two.)

- * I am not a component lead.
- * I do not have the Assignable User permission.
- * The other users do not have the Assignable User permission.
- * The other users do not have the Edit Issues permission.
- * The other users do not have the Assign Issues permission.

NEW QUESTION 36

Analyze the workflow scheme for the SSP project shown below:

Workflow	Issue Types
Software Simplified Workflow for Project SSP (View as text)	 Story  Epic  Task  Sub-task (Assign)
classic default workflow (View as text)	 Bug (Assign)

Which change would require an update to the workflow scheme?

- * Sub-task and Bug need a different set of statuses.
- * Task and Sub-Task need a different screen when being edited.
- * Story and Epic need a different set of statuses.
- * Story and Task need a different screen when being created.

NEW QUESTION 37

You want to gather metrics on how long it takes the team to resolve issues in their project.

Which report should you use?

- * Resolution Time Report
- * Single Level Group By Report
- * Time Tracking Report
- * Time Since Issues Report
- * Average Age Report

NEW QUESTION 38

You need a new project to track Software Defects.

The entire setup should be identical to the Hardware Defect project.

You ask your Jira administrator to create a new project with a shared configuration, and use the Hardware Defect project as the source.

Which three elements will you need to manually configure to achieve an identical setup? (Choose three.)

- * Project description
- * Security levels
- * Screens
- * Components
- * Versions
- * Priorities

NEW QUESTION 39

All projects use only a single simplified workflow which has three statuses (Open, In Progress, Closed) and all global transitions.

You need to find all issues that were in the Closed status at some point in their lifecycle.

Select the correct JQL query.

- * status CHANGED FROM In Progress; TO Closed
- * status = Closed OR (status WAS Closed AND status = Open)
- * status WAS Closed
- * status CHANGED TO Open

NEW QUESTION 40

The extract of a permission scheme is shown below:

Permission	Granted to
Administer Projects	Project role: Administrators
Browse Projects	Project role: Viewers Application access: Any logged in user
Create Issues	Project role: Creators
Edit Issues	Project role: Editors
Link Issues	Project role: Linkers
Transition Issues	Project role: Transitioners

Angela is a new team member. Her main tasks are:

- * Search the project for duplicate bugs

– Link them

– Close duplicate bugs in the workflow

Which two project roles does she need? (Choose two.)

- * Linkers
- * Creators
- * Editors
- * Transitioners
- * Viewers
- * Administrators

NEW QUESTION 41

How do you configure the default unit for time tracking (minute, hour, day, week) in Jira?

- * per issue type
- * per project
- * per user
- * per group
- * per instance

NEW QUESTION 42

A project uses the Simplified Workflow and a Scrum board.

You are the project administrator and the board administrator, but Extended project administration is disabled.

Which two actions can you perform? (Choose two.)

- * add a status via the workflow editor
- * add a status via the Scrum board
- * set a workflow resolution via the Scrum board
- * set a workflow resolution via the workflow editor
- * add a transition via the workflow editor
- * add a condition via the Scrum board

NEW QUESTION 43

You need a way to put issues On Hold.

Additionally you need to filter for all issues that:

– were put On Hold by user Dave

– were put On Hold in the last 30 days

The current workflow is shown below:

Which combination of configuration items will meet the requirements?

- * Status, screen
- * Status, transitions
- * Transition, custom field (User Picker)
- * Transition, post-function
- * Screen, custom field (Date picker)

NEW QUESTION 44

Which statement is true about configuring issue types in a project?

- * Standard and sub-task issue types must always have their own workflows.
- * Epics cannot have sub-tasks in a Jira Software project.
- * There are three levels of issue types in a Jira Software project; Epic, Story, Sub-task.
- * Sub-task issue types can have a different issue security level than their parent.
- * An issue type scheme can have unlimited sub-task issue types.
- * You can disable the Create Sub-task operation on some standard issue types.

NEW QUESTION 45

Max and Emma both have Jira Software application access, and they are members of the same groups and project roles in the DEV project.

However, Max can rank issues on the project's Kanban board, while Emma cannot.

Which configuration will definitely explain the observed behavior?

- * Max and Emma have different global permissions.
- * Only Max has a valid Jira Software license.
- * Only Max is a project administrator of the DEV project.
- * Max and Emma are associated with different security levels.
- * Only Max has been granted the Schedule Issues permission in the DEV project.
- * Max is a component lead and Emma is a project lead in the DEV project.

NEW QUESTION 46

You work for an insurance company and want to use Jira for tracking customers and their contracts.

Before requesting a new project you have gathered some requirements:

• Each customer can have multiple contracts.

• Each contract can have an independent status.

• Each contract will be worked on by a different agent.

• Contracts cannot exist without a corresponding customer.

How should contracts be configured?

- * as fields on a screen
- * as sub-task issue types
- * as tabs on a screen
- * as workflow statuses

NEW QUESTION 47

You manage multiple projects which share a notification scheme. For the Issue Moved event, you want to notify only a particular individual. That individual needs to be selected by other users.

Which value should be used for the Issue Moved event?

- * Single User
- * Developers project role
- * User Custom Field Value
- * Current User
- * Component Lead
- * Single Email Address

NEW QUESTION 48

In your last team meeting Scott showed a QA dashboard he has put together. It contains valuable data so he decides to share it with the entire project.

When you try to pull up the dashboard for the first time it shows multiple errors instead of the data you expected.

The most common error is: The filter configured for this gadget could not be retrieved. Please verify it is still valid on the issue navigator.

Scott confirms, that the dashboard seems fine when he looks at it.

What is the most likely cause for this behavior?

- * The filters being used in the gadgets return issues that are hidden by a security level.
- * The filters being used in the gadgets have been deleted.
- * The filters being used in the gadgets contain corrupt JQL clauses.
- * The filters being used in the gadgets are private or not shared with you.
- * The filters being used in the gadgets contain field references that have been deleted.

NEW QUESTION 49

Analyze the workflow scheme for the SSP project shown below:

Workflow	Issue Types
Software Simplified Workflow for Project SSP (View as text)	<ul style="list-style-type: none">  Story  Epic  Task  Sub-task (Assign)
classic default workflow (View as text)	<ul style="list-style-type: none">  Bug (Assign)

Which change would require an update to the workflow scheme?

- * Task and Story need different screens when they are transitioned to Done.
- * Task and Story need a different screen when they are being created.
- * Epic and Bug need different screens when they are transitioned to Done.
- * Sub-task and Bug need a different set of required fields.
- * Task and Sub-task need a different set of required fields.

NEW QUESTION 50

Below you are shown an extract of a field configuration used by all issue types in your project.

Name	Required	Renderers	Screens
A detailed description	Yes	Wiki Style Renderer	 1 screen

The field 'A detailed description' is a custom field of type Text field (multi-line).

Which two statements are true? (Choose two.)

- * Users will be able to format text in the field.
- * The field can only be used in combination with the Description system field.
- * The field is mandatory in each issue type used in the project.
- * The project is configured to use only a single screen.
- * The maximum text length is limited to 100 characters.

NEW QUESTION 51

View the extract of a permission scheme shown below.

Permission	Granted to
Administer Projects	Group: jira-administrators
Browse Projects	Project role: Users
Create Issues	Application access: Any logged in user
Edit Issues	Group: jira-software-users Project role: Users Single user: admin Application access: JIRA Core
Delete Issues	Group: jira-software-users Project role: Users

Which two statements are correct? (Choose two.)

- * Users in the project role Administrators can update components and versions.
- * Users must be in either the jira-software-users group or the Users project role to delete issues.
- * All logged in users can create issues.
- * Users must be in both in the jira-software-users group and the Users project role to delete issues.
- * Users can edit issues only if they have a valid Jira Core license.

NEW QUESTION 52

You have gathered workflow requirements:

• Sue wants to put issues ON HOLD from anywhere in the workflow.

• Dave wants to restrict who can put issues ON HOLD.

You contact a Jira administrator to request appropriate workflow changes to address their requirements.

Which change do you NOT request?

- * A condition on the incoming transitions going in to ON HOLD
- * A global transition to the ON HOLD status
- * Outgoing transitions from the ON HOLD status
- * A security-level on the ON HOLD status
- * A new status called ON HOLD

NEW QUESTION 53

You are asked to change who receives notifications when issues are moved.

The settings in the default notification scheme used by your project are shown in the table below.

Issue Moved (System)	Current Assignee <ul style="list-style-type: none">• Reporter• All Watchers
-----------------------------	---

As a project administrator, why are you NOT able to update the notification scheme?

- * The notification scheme is shared.
- * You are not a Jira administrator.
- * The extended project administration option is not enabled.
- * The default notification scheme cannot be edited.

NEW QUESTION 54

Which two can project administrators associate with project roles? (Choose two.)

- * Security levels
- * Application access
- * Global permissions
- * Groups
- * Individual users
- * Project permissions
