Get Ready to Pass the 71200X exam with Avaya Latest Practice Exam Get Prepared for Your 71200X Exam With Actual Avaya Study Guide! QUESTION 58

Which statement about making Avaya Aura Communication Manager (CM) work successfully as a feature server for CM SIP Endpoints (AST Endpoints) is true?

- * CM does not support SIP Endpoints in Aura 7.x.
- * A SIP Trunk between CM and Avaya Aura Session Manager (SM) is enough, no further administration is required.
- * CM must be added as an Application, in an Application Sequence for Avaya Aura Session Manager (SM).
- * Endpoint must register directly with CM.

QUESTION 59

Which statement describes the role of Serviceability Agents?

- * It enables simultaneous System Manager and Session Manager Backups.
- * It enables alarms to be sent to System Manager.
- * It allows the administration of SIP Call Center agents.
- * It can be used to automatically upgrade Session Manager to the latest software release.

QUESTION 60

Which three configuration points are necessary before you can build a Network Routing Policy? (Choose three.)

- * Location
- * User Profile
- * Avaya Aura Communication Manager (CM) Profile
- * Domain
- * SIP Entity

AVAYA
Aura® System Manager 7.0

Home Routing

Home / Elements / Routing

Introduction to Network Routing Policy

Network Routing Policy consists of several routing applications like "Domains", "Locations", "SIP Entities", etc. The recommended order to use the routing applications (that means the overall routing workflow) to configure your network is as follows:

- Step 1: Create "Domains" of type SIP (other routing applications are referring domains of type SIP).
- Step 2: Create "Locations"
- Step 3: Create "Adaptations"
- Step 4: Create "SIP Entities"
 - SIP Entities that are used as "Outbound Proxies" e.g. a certain "Gateway" or "SIP Trunk"
 - Create all "other SIP Entities" (Session Manager, CM, SIP/PSTN Gateways, SIP Trunks)
 - Assign the appropriate "Locations", "Adaptations" and "Outbound Proxies"

QUESTION 61

How do you verify that the Avaya Aura Session Manager Replica Node is synchronized?

- * PuTTY to Avaya Aura Session Manager and run statusapp, and then check that all processes are started.
- * Check in the Replica Group with a green “Session Manager OK”.
- * Check the Replica Group/Replica Nodes for a status of synchronized.
- * Register an Avaya SIP Telephone (AST) and check to see its feature buttons.

QUESTION 62

In Avaya Aura System Manager (SMGR), the menu option “Services/Events/Alarms” is used to perform which three functions? (Choose three.)

- * Change the status of an alarm.
- * Export alarms.
- * View an alarm.
- * Get the dashboard information of Avaya Aura Session Manager.
- * Add new custom alarms.

QUESTION 63

In Avaya Aura System Manager (SMGR), the menu option “Services/Events/Alarms” is used to perform which three functions? (Choose three.)

- * Change the status of an alarm.
- * Export alarms.
- * View an alarm.
- * Get the dashboard information of Avaya Aura Session Manager.
- * Add new custom alarms.

QUESTION 64

When you attempt to login to one X Communicator using TLS, It fails and displays the Login Error:

“The security certificate required for login is not installed. Please contact your support team.;; What must you do to fix this error?

- * Install the SM Identity certificate into the Trusted Root Certificate Authorities on CM.
- * Install the Certificate Authority certificate that signed Avaya Aura Session Manager’s (SM) Identity certificate into the Trusted Root Certificate Authorities on the PC.

- * Import the Identity Certificate from the Security menu of the one-X Communicator.
- * Export the identity certificate from Avaya Aura Session Manager and Import it into the PC using copy and paste.

QUESTION 65

you are creating an OPTION trunk between Avaya Aura Session manager (SM) and Avaya Aura Communication Manager (CM) to separate the SIP traffic for your Advanced SIP Telephone (AST) users.

How would you create a second SIP Trunk between SM and CM, when you already have an existing SIP trunk between these two entities for regular traffic?

- * A second link should not be created as OPTIM traffic must be sent down the existing SIP link.
- * Assign secondary IP addresses for both SM and CM to create a second SIP link between.
- * Create an additional SIP Entity, SIP Entity Link and CM Signaling/Trunk Group using an alternate TLS port (such as 5062).
- * Specify a new Entity Link on the existing CM SIP Entity but using UDP instead of TLS as the Transport Protocol.

QUESTION 66

Facility Restriction Level (FRL) can be used to control the privileges of a call originator. What are the levels of FRL that can be assigned?

- * 0 – 10 (with 10 being the lowest privilege level)
- * 0 – 10 (with 10 being the highest privilege level)
- * 0 – 7 (with 7 being the lowest privilege level)
- * 0 – 7 (with 7 being the highest privilege level)

QUESTION 67

When you attempt to login an Avaya Workplace client using TLS, it fails and displays the error:

Phone service problem: The server certificate is not trusted. Which action would you take to resolve this error?

- * Install the Avaya Aura Session Manager (SM) Identity certificate into the Trusted Root Certificate Authorities on Avaya Aura Communication Manager (CM).
- * Export the identity certificate from Avaya Aura Session Manager (SM) and import it into the PC using copy and paste.
- * Install the Certificate Authority certificate that signed the Avaya Aura Session Manager (SM) Identity certificate Into the Trusted Root Certificate Authorities on the PC.
- * Import the Identity Certificate from the Security menu of the Equinox client into the Avaya Aura Session Manager (SM) Identity certificate on Avaya Aura Communication Manager (CM).

QUESTION 68

To make up the Avaya Aura Core, which three link or relationships are the minimum that must be built? (Choose three.)

- * an LDAP link from Avaya Aura System Manager (SMGR) to the corporate Directory Server
- * a trust relationship between Avaya Aura System Manager (SMGR) and Avaya Aura Session Manager (SM)
- * a SIP Trunk between Avaya Aura Communication Manager (CM) and Avaya Aura System Manager (SMGR)
- * a CM managed element to Avaya Aura System Manager (SMGR)
- * a SIP Trunk between Avaya Aura Session Manager (SM) and Avaya Aura Communication Manager (CM)

QUESTION 69

In Avaya Aura, which interface must an H.323 Endpoint be configured to register with?

- * Avaya Aura Session Manager SM-100

- * Avaya Aura Media Server
- * Avaya Aura System Manager Server
- * Avaya Aura Communication Manager Processor Ethernet

QUESTION 70

Release 8.x Avaya Aura Core products are available as bundled OVA packages for which two platforms? (Choose two.)

- * VMware
- * System Platform
- * Customer Provided Redhat OS K D) Linux KVM
- * Windows Server 2019

QUESTION 71

Which list trace command can trace the traffic entering and leaving Avaya Aura Communication Manager (CM) on a specific trunk?

- * list trace vdn
- * list trace tac
- * list trace ras
- * list trace station

QUESTION 72

What can be done from the Session Manager Dashboard in Avaya Aura System Manager?

- * Select each administered SM for each SIP-User
- * Get information status and health summary of each administered SM
- * Administer (create new user) each administered SM
- * Import data (synchronized) from each administered the SM

QUESTION 73

In Avaya Aura 7.x, where are the listening ports defined to allow Avaya Aura Session Manager (SM) to listen for User Agent (UA) registrations?

- * Communication Profile
- * SM Firewall
- * SIP Entity
- * SM Administration

cs-sm	TCP	5060	cesalpha-presence	5060
cs-sm	TCP	5060	cs-cm	5060
cs-sm	TCP	5060	SBCNTY-VMWARE-DEMO	5060

QUESTION 74

What is the Avaya supported method of backing up an Avaya AuraSession Manager (SM) database?

- * Perform the backup from an Avaya Aura System Manager.
- * Connect a Memory Drive into the SM Server with an automatic Backup-making script.
- * Access the SM Command Line Interface (CLI) and perform a Backup manually.
- * Wait for the overnight Backup process to send you a copy of the .tar file automatically.

Chapter 13: Managing system data

Backup and Restore

The backup and restore functions run on System Manager.

System Manager creates one backup file that contains all the data for the entire system. You do not need to create individual backup files of all the Session Manager instances. The data and configuration files for the entire system are stored centrally on System Manager.

System Manager supports local backup and remote backup. You can transfer backup files by using the sftp or scp protocol.

You can perform either a backup or a restore operation at a specified time. The restore operation fails if a backup operation is in progress. When a restore operation is in progress, the system ignores all backup jobs that are scheduled at that time. System Manager displays a warning if you attempt to restore a corrupted or tampered backup file.

QUESTION 75

Which configuration step is necessary to make a Simple SIP Phone register successfully with Avaya Aura Session Manager (SM)?

- * Create a Communication Manager Profile for that user.
- * Add a Routing Profile for that endpoint.
- * Build a SIP Trunk to Avaya Aura Communication Manager.
- * Create a Communication Profile for that SIP User.

Creating a SIP User

In this exercise, each student will create two SIP users.

Step 1: Create a User Profile

- Log in as **abrown** or **abrown2**
- Navigate to **Home > Users > User Management**
- Select **Manage Users**
- Click **New**

Understanding functional and technical aspects of The Avaya Aura Core Components Integration (71200X) Avaya Team Engagement Core Solutions Components

The following will be discussed in **AYAYA 71200x exam dumps**:

- Identify the role of Session Manager, the deployment process, and troubleshooting tools- Perform basic administration and troubleshooting for the Avaya core components.- Distinguish between the Avaya Aura® Core components, the Communication bundle, and the Collaboration bundle- Describe the deployment process for the core products in the Avaya Team Engagement solution.
