# Start your C-HANATEC-17 Exam Questions Preparation with Updated 272 Questions [Q86-Q103

Start your C-HANATEC-17 Exam Questions Preparation with Updated 272 Questions A Fully Updated 2023 C-HANATEC-17 Exam Dumps - PDF Questions and Testing Engine

Brief Overview of certification Worth of SAP C_HANATEC_17 Exam

SAP HANA is a very powerful technology that can be used in different domains. It is an in-memory database. It is a platform that can help companies in all aspects.Moreover, it is a complete platform. SAP HANA can help in a wide variety of business applications. It can help in every area where businesses need help. This technology can help in managing the business processes and operations. SAP HANA is the most powerful technology in the market. **SAP C_HANATEC_17 Dumps** contains questions and answers from the actual certification exam. We make sure that our products are up to date with the current market trends and requirements. The material in this product is completely relevant to the actual certification exam. Our products are designed to ensure that you get all the information that you need to pass the exam. In brief, we provide you with a complete package for the preparation of the certification exam. We make sure that you get a complete knowledge about the product that will be used to pass the exam. That is why we recommend using this product as your first step towards certification. Answer the questions that are included in this product in the same manner as you do in the actual exam. T You can use the practice test to evaluate your performance before you purchase the product.

Brief Overview of importance of SAP C_HANATEC_17 Exam Certification

SAP HANA is a revolutionary new platform for Big Data analytics and data management. As a result, it has created a lot of interest amongst the SAP community, and the number of SAP HANA certified individuals has increased rapidly over the last few years. **SAP C_HANATEC_17 Dumps** are designed to verify that candidates have the knowledge and skills required by a SAP HANA technology consultant. Improve your employability by becoming an SAP HANA certified professional. Actual certification exam questions from actual exams are available. Prepare for your next certification exam with this SAP C_HANATEC_17 practice test. Product quality is very high and provides you with comprehensive content that can help you in any way possible. Guarantee that you pass the real SAP C_HANATEC_17 Exam with this practice test. Send us your feedback after using this practice test. Updates to this practice test will be made frequently to ensure that you always stay ahead of the competition. Study the question topics, formats, and the answers provided in the practice test and make sure that you prepare yourself for the real exam. Update the demo practice test as you go through the preparation process. Customer support service is available 24/7. Replication of the actual exam scenario can be made possible by taking the practice test. Outcome based testing is available in the practice test.

SAP C-HANATEC-17 Certification Exam Topics:

Topic AreasTopic Details, Courses, Books**SAP HANA Installation, Configuration and Upgrade > 12%**Performing installation, update and post-installation configuration tasks of the SAP HANA 2.0 database system.   HA200 (SAP HANA 2.0 SPS05)   HA201 (SAP HANA 2.0 SPS05)   **SAP HANA Database Security 8% - 12%**Understand the SAP HANA database system security concepts, create SAP HANA users and roles and setup audit policies.   HA200 (SAP HANA 2.0 SPS05)   **Database Migration Options for SAP HANA 8% - 12%**Be able to perform database migrations from AnyDB to SAP HANA using the Database Migration Option (DMO) of SUM.   HA100 (SAP HANA 2.0 SPS05)   HA200 (SAP HANA 2.0 SPS05)   HA250 (SAP HANA 2.0 SPS05)   **SAP HANA Backup and Recovery 8% - 12%**Configure and execute SAP HANA database system backups and restores in single host and system replication setups.   HA200 (SAP HANA 2.0 SPS05)   HA201 (SAP HANA 2.0 SPS05)

NO.86 What are the prerequisites for using the Web user interface for HDBLCM? There are 2 correct answers to this question.
* The SAP HANA database is revision 90 or higher
* The communication port 1329 is open
* Internet Explorer – Version 8 or higher
* The communication port 1129 is open

NO.87 What cryptographic libraries are supported in SAP HANA by default?

There are 2 correct answers to this question.
* LibgCrypt
* OpenSSL
* Common Cryptolib
* WolfCrypt

NO.88 What do you need to size before you install SAP HANA in a tailored data center integration (TDI) scenario? There are 3 correct Answers to this question.
* SAP Application Performance Standard (SAPS)
* Network throughput
* Input/output operations per second (IOPS)
* Main memory
* Persistent storage

NO.89 Which information can you analyze using the Troubleshoot Unresponsive System application?
* System availability
* Alerts count

* Thread status
* CPU utilization

NO.90 How can you minimize the database migration option (DMO) downtime?
* Run the benchmarking tool parallel to the DMO to automatically adjust the number of R3load processes
* Use the benchmarking tool for a productive database migration with the DMO procedure
* Provide the measured table migration duration for table sequencing during benchmarking
* Adjust the number of R3load processes during benchmarking and the DMO procedure

NO.91 You needt to integrate an existing SAP HANA2.0 SPS05 database system into the SAP HANA cockpit monitor infrastructure. Where do you create the technical user needed for the resource registration?
* In the first tenant
* In the SYSTEMDB and all tenants
* In the SYSTEMDB and the first tenant
* In the SYSTEMDB

NO.92 What is the correct sequence of the following four steps in the restart of the SAP HANA database system?

Please choose the correct answer.
* Aborted transactions are rolled back. 2. Open transactions are recovered. 3. Row tables are loaded into memory. 4. Column tables are loaded.
* Aborted transactions are rolled back.
* Row tables are loaded into memory. 3. Open transactions are recovered. 4. Column tables are loaded.
* Row tables are loaded into memory. 2. Column tables are loaded. 3. Open transactions are recovered. 4.

Aborted transactions are rolled back.
* Row tables are loaded into memory. 2. Open transactions are recovered. 3. Aborted transactions are rolled back. 4. Column tables are loaded.

NO.93 You need to periodically monitor if the SAP HANA primary system is online. Which tool do you use?
* systemreplicationStatus
* HDBAdmin
* hanasitter
* landscapeHostConfiguration

NO.94 Why do we still need a persistent layer? There are 2 correct answers to this question.
* To store data that has been unloaded from memory
* To enable full database recovery if we have a power failure
* To hold the delta store for newly arrived records
* To store data that is frequently used

NO.95 Which value for the Autostart parameter do you use to control the automatic start of an SAP HANA system?

Please choose the correct answer.
* On
* 0
* Off
* 1

NO.96 What is a characteristic of the Delta Data Shipping operation mode in SAP HANA system replication? There are 2 correct

answers to this question.
* Delta data shipping takes place in addition to continuous log replay.
* Delta data shipping takes place with continuous read-only access to the secondary system.
* Delta data shipping takes place in addition to continuous log shipping.
* Delta data shipping takes place every 5 minutes.

NO.97 Which services can you stop in the SAP HANA cockpit from the SYSTEMDB Manage Services app?

There are 2 correct answers to this question.
* Daemon
* Preprocessor
* Index server
* Compile server

NO.98 Which backup scenarios are allowed in multitenant database containers? Note: There are 2 correct answers.
* The system database can initiate its own backup and the backup of tenant databases
* A backup of a tenant database can be recovered to an SAP HANA single-container system
* The system database should be recovered first in order to recover the tenant databases
* A tenant database can initiate its own backup unless this is prohibited by the system configuration

NO.99 Which actions are performed during the database migration option (DMO) procedure when you select the ‘Do not compare table contents’ option?

There are 2 correct answers to this question.
* A row count is executed for the migrated tables.
* The content comparison is performed for repository tables.
* A check sum is generated every 10000 rows.
* The clustered tables are decluttered.

NO.100 What can you do to shorten the startup time of an SAP HANA system after a reboot?
* Flag all columnar tables for preload.
* Set the savepoint interval to a lower value.
* Set the preload column value in the Tables system table to FULL.
* Partition the row store across nodes.

NO.101 You define the parameters for the password policy of an SAP HANA tenant database. Where are these parameters stored?
* indexserver.ini
* multidb.ini
* global.ini
* nameserver.ini

NO.102 You switched the SAP HANA database to normal log mode. When does the system perform a regular log backup? Note: There are 2 correct answers.
* When a savepoint occurs
* When the log buffer is full
* After the configured time threshold has been exceeded
* When the log segment is full

NO.103 What do you need to size before you install SAP HANA in a tailored data center integration (TDI) scenario?

There are 3 correct Answers to this question.

* SAP Application Performance Standard (SAPS)
* Network throughput
* Input/output operations per second (IOPS)
* Main memory
* Persistent storage
