### SAP HANADEV 18 Certification Exam Details:

Sample Questions SAP HANADEV 18 Certification Sample Questions Reference Books HA150, HA300, HA450 Duration 180 mins Passing Score C\_HANADEV\_18 - 61% Exam Price \$560 (USD)

### SAP HANADEV 18 Certification Exam Topics:

Topic Areas Topic Details, Courses, Books Weighting Manage Source Code Using Git Use the Git source control system. Use GIT commands for version control. HA450 < 8% Define Application Security Describe basic concepts of authorizations in an XSA application. Maintain application security in a multi-targeted application project. HA450 < 8% Develop a Multi-Target Application Explain XSA application Command-Line client, XSA application administration and monitoring tools, Web IDE. Describe development using Server Side JavaScript with Node.js, how to create a Node.js module, and how to execute a Node.js module. Debug the Node.js application. Explain how to access the database. Explain the deployment process. Install SAP HANA 2.0, express edition. HA150, HA450 > 12% Use Database Security Explain authorizations in the SAP HANA database. Create authorization roles within a multi-target application project. Use analytic privileges. Grant privileges for external objects within a

multi-target application project. HA450< 8% Create and Integrate the UI Explain basic concepts about the HTML5 module. Configure the Router to integrate the HTML5 module with back end. Explain basic SAPUI5 concepts and the structure of an SAPUI5 application. Create a basic SAPUI5 project. HA450< 8%

**NO.22** How do you debug a Node.js module in SAP Web IDE for SAP HANA? Please choose the correct answer.

- \* Set the enabled parameter to true in the section debugger of the xsengine.ini file.
- \* Add the sap.hana .xs.debugger::Debugger role to the HDI Container's #RT User.
- \* Start the debugger from the XS command line interface and run the program in SAP Web IDE for SAP HANA.
- \* Attach the debugger to the application in the SAP Web IDE for SAP HANA.

**NO.23** What are the main SAP HANA engines responsible for executing calculation views? There are 3 correct answers to this question.

- \* Java Engine
- \* XS Engine
- \* OLAP Engine
- \* Calculation Engine
- \* Join Engine

**NO.24** You need to edit a database procedure. You are concerned that the version of the database procedure file you have in your local Git repository may not be synchronized with the latest version in the remote Git repository, but at this time, you do NOT want to sync the file. You only want to see the commits applied to the file in the remote repository. Which command must you use?

- \* Git stash
- \* Git fetch
- \* Git merge
- \* Git pull

**NO.25** What are the nodes where filter expressions can be used in a calculation view? There are 2 correct answers to this question.

- \* Aggregation
- \* Star join
- \* Union
- \* Rank

**NO.26** Which trace do you use to create a graphical representation of an individual SQL Statement? Please choose the correct answer.

- \* Expensive statements trace
- \* Performance trace
- \* Plan trace
- \* SQL trace

**NO.27** You need to access a remote database table object within your HDB module in a Multi-target application project.

In SAP HANA extended application services, advanced model (XS advanced) a user-provided service was created to access the external schema. The service is already declared in the Multi-target application project YAML file.

Which activities do you perform?

- \* There are 3 correct answers to this question.
- \* Create a view that refers to a synonym.
- \* Create a synonym that refers to the view.

- \* Create/update the .hdbgrants file providing authorizations for the remote schema.
- \* Create a synonym for the remote table object.
- \* Create a view that refers to the table.

**NO.28** What characterizes the Node.js environment? There are 2 correct answers to this question.

- \* It uses a synchronous programming model.
- \* It is a client-side design-time environment for JavaScript.
- \* It is single-threaded.
- \* It is built on Google's V8 JavaScript engine.

**NO.29** To which SAP HANA authorization entities can you grant a role? There are 2 correct answers to this question.

- \* Object
- \* Role
- \* Privilege
- \* User

**NO.30** Which services can you use in SAP HANA, express edition? There are 3 correct answers to this question.

- \* Dynamic tiering
- \* Text analytics
- \* Multi-core and parallelization
- \* System replication
- \* Columnar OLTP and OLAP

**NO.31** You are asked to produce sales value for the month using sales order line items (sales price per item x quantity sold) what do you use to achieve this in a calculated column of a calculation view? There are 2 correct answers to this question.

- \* Keep flag
- \* Dynamic join
- \* Transparent filter
- \* Non-equijoin

**NO.32** In application development with XS advanced, which of the following entities belong to a specific SPACE? There are 2 correct answers to this question.

- \* Organizations
- \* Users
- \* Applications
- \* Processes

**NO.33** Which SAP HANA system views contain information about the object ownership? There are 2 correct answers to this question.

- \* SCHEMAS
- \* TABLES
- \* OBJECTS
- \* ROLES

**NO.34** What do you use to set up unit testing for your SQL Script procedure? Please choose the correct answer.

- \* SQL Script logging procedures
- \* A library with language SQLSCRIPT TEST
- \* The SQL Script debugger
- \* The SQL Script Code Analyzer

**NO.35** Which OData capacities are supported in SAP HANA extended application services, advanced model (XSA)? There are 3 correct answers to this question.

- \* Union
- \* Aggregation
- \* Join
- \* Projection
- \* Association

**NO.36** What are the characteristics of SAP HANA calculation views? There are 2 correct answers to this question.

- \* Need an application server to execute
- \* Need database tables to execute
- \* Do NOT need database tables to execute
- \* Do NOT need an application server to execute

**NO.37** Which application runtimes are currently supported by the SAP Cloud Application Programming Model? There are 2 correct answers to this question.

- \* Go
- \* Node.js
- \* Python
- \* Java

**NO.38** Which OData capacity do you use when you need to restrict the number or selection of exposed columns? Please choose the correct answer.

- \* Parameter entity sets
- \* Aggregation
- \* Key specification
- \* Property projection
