Required Properties:

Address:

webserver1.lab.local

File Path:

C:\inetpub\wwwroot\web.config

XML Element:

/configuration/appSettings/add[@key="PASSWORD"]

Connection Type:

Windows File Sharing ▼

Optional Properties:

Port:

XML Attribute:

Password Regex:

Backup Password File:

Usage Display Name:

Value

(.*)

[Select] ▼

Disable automatic management for this account

Reason:

No Reason

Save

Cancel

What is the least intrusive way to accomplish this?

- * Use the “change” button on the usage’s details page.
- * Use the “change” button on the parent account’s details page.
- * Use the “sync” button on the usage’s details page.
- * Use the “reconcile” button on the parent account’s details page.

NEW QUESTION 49

One can create exceptions to the Master Policy based on _____.

- * Safes
- * Platforms
- * Policies
- * Accounts

NEW QUESTION 50

Which of the following logs contains information about errors related to PTA?

- * ITAlog.log
- * diamond.log
- * pm_error.log

* WebApplication.log

NEW QUESTION 51

An auditor needs to login to the PSM in order to live monitor an active session. Which user ID is used to establish the RDP connection to the PSM server?

- * PSMConnect
- * PSMMaster
- * PSMGwUser
- * PSMAdminConnect

NEW QUESTION 52

What is the name of the Platform parameters that controls how long a password will stay valid when One Time Passwords are enabled via the Master Policy?

- * Min Validity Period
- * Interval
- * Immediate Interval
- * Timeout

Explanation

Min Validity Period -The number of minutes to wait from the last retrieval of the password until it is replaced.

This gives the user a minimum period to be able to use the password before it is replaced. Use -1 to ignore this property. This parameter is also used to release exclusive accounts automatically Interval -The number of minutes that the Central Policy Manager waits between running periodic searches for the platform. Note: It is recommended to leave the default value of 1440. If a change/verify policy has been configured, the Central Policy Manager will automatically align the periodic searches with the start of the defined timeframes.

NEW QUESTION 53

Within the Vault each password is encrypted by:

- * the server key
- * the recovery public key
- * the recovery private key
- * its own unique key

NEW QUESTION 54

What is the purpose of the HeadStartInterval setting in a platform?

- * It determines how far in advance audit data is collected for reports
- * It instructs the CPM to initiate the password change process X number of days before expiration.
- * It instructs the AIM Provider to skip the cache; during the defined time period
- * It alerts users of upcoming password changes x number of days before expiration.

Explanation

The number of days before the password expires (according to the ExpirationPeriod parameter) that the CPM will initiate a password change process. This parameter is not relevant if the policy will be applied to a member of an account group.

NEW QUESTION 55

To use PSM connections while in the PVWA, what are the minimum safe permissions a user or group will need?

- * List Accounts, Use Accounts
- * List Accounts, Use Accounts, Retrieve Accounts
- * Use Accounts
- * List Accounts, Use Accounts, Retrieve Accounts, Access Safe without confirmation
