

Best VMware 1V0-41.20PSE 2023 Training With 32 QA's [Q17-Q34]

Best VMware 1V0-41.20PSE 2023 Training With 32 QA's VMware 1V0-41.20PSE Certification Exam Questions

VMware 1V0-41.20PSE certification exam is designed for IT professionals who want to validate their skills and knowledge in network virtualization. Associate VMware Network Virtualization certification is part of the VMware Certified Associate (VCA) program and focuses on the basics of VMware network virtualization. 1V0-41.20PSE exam tests one's understanding of VMware NSX-T Data Center technology and its use cases.

Q17. How does virtual networking enable business to reduce time-to-market?

- * By performing automatic hardware upgrades
- * By increasing traffic bandwidth
- * By removing physical network devices
- * By providing network services on demand

Q18. Which two statements are true about N-VDS/VDS? (Choose two.)

- * It is a module deployed in all transport nodes that provides L2 functionality.

- * It is a module deployed in all transport nodes that provides L3 functionality.
- * Bare-metal servers support both N-VDS and VDS.
- * ESXi hosts support both N-VDS and VDS.
- * KVM hosts support both N-VDS and VDS.

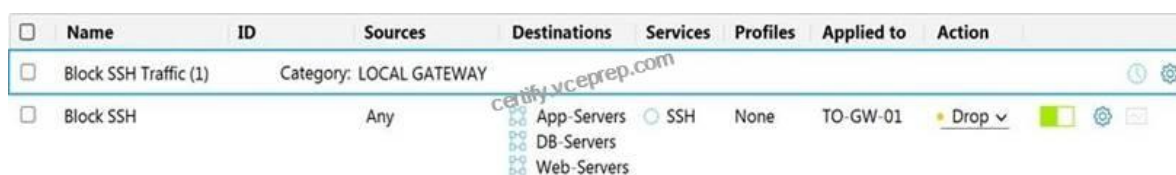

Q19. What is one way to access the NSX Manager?

- * vSphere Client with a supported browser
- * NSX UI with a supported browser
- * NSX Manager via Telnet
- * NSX Manager through a dedicated fat client

Q20. What is the benefit of connecting segments to Tier-1 Gateways?

- * Enhanced cloud consumption model
- * Enhanced micro-segmentation model
- * Enhanced East/West communication
- * Enhanced North/South communication

Q21. Given this exhibit:

The screenshot shows a table of firewall rules in NSX Manager. The rule 'Block SSH Traffic (1)' is highlighted. It is a distributed firewall applied to App-Servers, DB-Servers, and Web-Servers, blocking SSH traffic on port 22. The action is set to 'Drop'.

Name	ID	Sources	Destinations	Services	Profiles	Applied to	Action
Block SSH Traffic (1)		Category: LOCAL GATEWAY		SSH	None	TO-GW-01	Drop
Block SSH		Any	App-Servers DB-Servers Web-Servers	SSH	None	TO-GW-01	Drop

Which statement is true about the firewall rule?

- * It is a distributed firewall applied to App-Servers, DB-Servers and Web-Servers that rejects traffic on port 22.
- * It is a gateway firewall applied to a Tier-1 gateway that rejects traffic on port 22.
- * It is a distributed firewall applied to App-Servers, DB-Servers and Web-Servers that drops traffic on port 22.
- * It is a gateway firewall applied to a Tier-0 gateway that drops traffic on port 22.

Q22. How can NSX-T Distributed Firewall help customers achieve security for newly migrated containerized applications?

- * Quality of service
- * Micro-segmentation
- * Dynamic routing
- * Network I/O control

Q23. A customer needs to secure its micro-services.

Which feature does NSX Data Center offer to help achieve this requirement?

- * Micro segmentation enforcement at container level
- * Integration with third-party vendors
- * Service Insertion for Containers
- * Easy Operation of Containers

Q24. What does a customer need to configure to create GENEVE backed segments using NSX-T Data Center?

- * VLAN Transport Zone
- * Virtual Distributed Switch

- * Virtual Standard Switch
- * Overlay Transport Zone

Q25. Which plane in the NSX-T Data Center Architecture is used to create, read, update, and delete (CRUD) operations?

- * Local Control Plane (LCP)
- * Management Plane
- * Data Plane
- * Central Control Plane (CCP)

Q26. A customer needs to manage and extend their data center network into VMware Cloud on AWS and Microsoft Azure Cloud.

Which VMware product should the customer use?

- * NSX Cloud
- * NSX Intelligence
- * vCloud Director Extender
- * vRealize Network Insight Cloud

Q27. A customer is planning to utilize NSX-T Data Center security services while maintaining current security services providers.

Which two features can help the customer achieve this kind of integration? (Choose two.)

- * Guest Introspection
- * Distributed Firewall
- * Network Introspection
- * Gateway Firewall
- * Intrusion Detection

Q28. Which protocol allows an administrator to provide overlay networks on top of physical networks used in NSX-T Datacenter?

- * Geneve Segments
- * Tier-0 Gateway
- * VXLAN
- * Distributed Firewall
