NEW QUESTION 36

Which of the following steps could be included in the process of installing an AddOn? Note: There are 3 correct answer to this question.
* Run ant all.
* Configure storefront properties files.
* Run ant addoninstall.
* Run ant modulegen.
* Copy files from the storefront to the AddOn web source folder.

NEW QUESTION 37

The miniature car replicas your company sells on its site are now available in a choice of colors, each at a different price point. You wish your product page to allow your customers to select the color before adding the replica to the cart. To complicate things, your boss won’t let you restart your production servers to add this functionality. What entities would you have to create to

achieve this?

* A ConfigurationCategory, an AbstractConfiguratorSetting for color, a ConfiguratorType, and an OrderEntryProductlnfo for each color a given replica is available in.

* A VariantCategory for color, a VariantValueCategory for each color, and a GenericVariantProduct for each color a given replica is available in.

* A ClassficationCategory, a ClassificationAttribute for color, a ClassificationAttributeUnit, a ClassificationAttributeValue for each color a given replica is available in, and a ClassAttributeAssignmentModel instance to tie them together.

* A ComposedType, that extends the VariantProduct type to add a color attribute, and an instance of this type for each color a given replica is available in.

NEW QUESTION 38

You synchronize a media item stored in SAP Commerce Cloud from a staged version to an online version. What happens next? Note: There are 2 correct answer to this question.

* Both staged and online media items now refer to the same image file in the file system.

* The staged and online media items now refer to two different image files in the file system.

* The values of the attributes are copied from the source item in the staged catalog to the target item in the online catalog.

* The media format in the staged version is also synchronized to the media format in the online version.

NEW QUESTION 39

You are implementing a new custom promotion action that changes the delivery mode of an order. What steps are required to make sure that the effects of this action are reverted as soon as the condition that triggered it is NO longer fulfilled? Note: There are 2 correct answer to this question.

* Implement the undo method in your custom rule action strategy

* Define a new session attribute to store the original delivery mode

* Implement your custom action item so that it can store the original delivery mode

* Create a promotion that uses the inverse action if the condition is NOT fulfilled

NEW QUESTION 40

You need to create a new custom promotion based on customer reviews for a product. You create a customPromotion extension with a new Rule Aware Object to keep customer reviews. In which file will you define this new Rule Aware Object?

* In the customPromotion-backoffice-config.xml file

* In the customPromotion-spring.xml file

* In the customPromotion-beans.xml file

* In the customPromotion-items.xml file

NEW QUESTION 41

Your solution has been live for a significant period of time. Now you need to update project data across multiple environments, but this update should only be executed once. What is the recommended approach for updating the project data?

* Create a class that extends AbstractPatchesSystemSetup and configure any data patches, which can run an import of your ImpEx files during an update.

* Extract a SQL script of all the changes in a single environment, which a OBA can then run directly against the database for all remaining environments.

* Create a class that extends AbstractSystemSetup and use the @SystemSetup annotation with TYPE.PROJECT, which can run an import of your ImpEx files during an update.

* With each deployment, manually import the ImpEx files via the hybris Admin Console or via the ant importimpex target.

NEW QUESTION 42

You are creating an extension with a web module. What do you need to ensure? Note: There are 2 correct answer to this question.

* An extension with a web module can only be extended with an addon.
* An extension with a web module must have a web folder.
* An extension with a web module must always have a core module.
* The web root must be set in the web module directive in the extensioninfo.xml file.

NEW QUESTION 43

Which of the core storefront features does Spartacus support? Note: There are 3 correct answer to this question.

* Customer Interests
* Wish List
* B2B Scheduled Replenishment
* Newsletter Subscription
* Configurable Promotions

NEW QUESTION 44

What should you pay attention to when connecting two widgets?

* The output socket's type does not have to be the same as the input socket's type.
* The input socket's type should be the same as the output socket's type.
* The output socket's type must be the same as the input socket type.
* The input socket's type must be a sub type of a composed item type.

NEW QUESTION 45

What is the recommended way to deploy Solr in a production environment? Note: There are 2 correct answer to this question.

* Embedded with the SAP Commerce Cloud server
* As one leading server and multiple subordinate servers
* As one standalone server
* As a Solr Cloud

NEW QUESTION 46

You are creating a new ancillary catalog for your site. Which of the following principles should you consider? Note: There are 2 correct answer to this question.

* Restrict the read and write access of this catalog in its permission tab in Backoffice.
* A catalog version has a hierarchy of categories, containing products.
* A catalog must have at least 2 versions: staged and online.
* You can create an unlimited number of catalog versions under this catalog.

NEW QUESTION 47

Your system contains a search restriction with the following parameters: Type: Product User: anonymous. Restriction: 1=0. There is a product "Candle" in the online catalog and a variant product "PinkCandle" in the online catalog. The system renders the Product Detail Page for Pink Candle using the following flexible search query: "SELECT {pk} FROM {VariantProduct} WHERE {code}="PinkCandle". What happens next?

* The flexible search query returns a null value.
* The flexible search query returns "PinkCandle".

* The flexible search query returns an SQL exception.
* The flexible search query returns an empty list. Question

NEW QUESTION 48

You are creating a new SolrlndexProperty as a facet and want to define it using facet ranges. What do you need to do to achieve that?

* Manually create SolrValueRange items to define the range boundaries. Create a SolrValueRangeSet, add SolrValueRange items, and add to the SolrlndexProperty.
* Define the number of ranges in the SolrlndexProperty. Provide sample data that isused to generate the SolrValueRange items.
* Define the cadence of the ranges in the SolrlndexProperty. Provide the sample data that is used to generate the SolrValueRangeSet.
* Create SolrValueRange items to define the range boundaries. Add them to the SolrlndexProperty.

NEW QUESTION 49

You need to add a new Cockpit to the Backoffice to implement new features for a business user role. Which tasks are required? Note: There are 2 correct answer to this question.

* Create or reuse an add-on, and install it into the storefront.
* Create a new multiplexer widget for the borderlayout widget.
* Create or reuse a Backoffice extension with the proper meta information.
* Add a new layout widget in config.xml.

NEW QUESTION 50

In Integration API Module, which of the following API verbs are controlled by access rights? Note: There are 2 correct answer to this question.

* Update – POST
* Create – POST
* Create – PATCH
* Update – POST, PATCH

NEW QUESTION 51

What attributes can you set for a SearchRestriction? Note: There are 2 correct answer to this question.

* restrictedType
* currentUser
* principal
* argumentType

NEW QUESTION 52

When you are defining properties in manifest.json, which of the following attributes are you allowed to use? Note: There are 3 correct answer to this question.

* value
* name
* environment
* key
* persona

NEW QUESTION 53

What happens when you use a deployment tag in the items.xml file? Note: There are 2 correct answer to this question.

* All instances of the enclosing type are stored in the specified database table.
* Only non-inherited properties of the enclosing type are stored in the deployment table.
* The deployment typecode is used as part of the primary key (PK) of that type's items.
* The name of the deployment table is generated automatically.

NEW QUESTION 54

To define the data that gets extracted into the Solr index for searching, what do you need to provide? Note: There are 2 correct answer to this question.

* A flexible search query for an incremental update
* A solrconfig XML file
* An ImpEx script for a full load
* A flexible search query for a full load

NEW QUESTION 55

What causes item data to be invalidated in the SAP Commerce Cloud entity cache? Note: There are 2 correct answer to this question.

* Receiving an invalidation event for the item via cluster messaging
* Calling the modelService.create() method passing a Model class
* Calling a setter method on a Model class
* Calling the modelService.save() method passing an item model

NEW QUESTION 56

You updated a price row for a particular product using the Backoffice Product Cockpit and also made sure the cronjob for synchronizing the involved product catalog was executed sucessfully. When you visit the category page containing the specific product, you discover that its new price value is NOT properly displayed. How can you fix this issue?

* Synchronize the category page in the Backoffice Administration Cockpit
* Run a Solr indexer operation in the Backoffice Administration Cockpit
* Synchronize the involved product in the Backoffice Product Cockpit directly
* Re-import the price using ImpEx

NEW QUESTION 57

How can CronJobs be started or aborted? Note: There are 3 correct answer to this question.

* CronJobs can be started manually using flexible search.
* CronJobs can be aborted automatically if a configurable time threshold is exceeded.
* CronJobs can be started manually via the Backoffice administration perspective.
* CronJobs can be aborted only if implemented as abortable.
* CronJobs can be started manually via the command line by running "ant runcronjob".

NEW QUESTION 58

What is the purpose of the dynamic forms in the Backoffice?

* To provide a dynamic extension of type definitions in the SAP Commerce platform
* To provide dynamic client-side validation of web forms

* To provide a dynamic layout of the wizards at runtime using drag and drop
* To enable dynamic behaviors in the user interface of Backoffice applications

NEW QUESTION 59

In an Accelerator-based storefront, which of the following would allow you to display a custom CMS Component? Note: There are 2 correct answer to this question.
* Create a JSP named [componentTypeCode].jsp that pulls data from a [ComponentTypeCode]Data object.
* Configure a custom controller bean and redefine the DefaultCMSComponentController alias to point to it.
* Configure a renderer in the cmsComponentRendererRegistry that doesn’t need to use a data object or a view.
* Create a controller for this component and register it in the cmsComponentControllerRegistry.

NEW QUESTION 60

What can a *-backoffice-widgets.xml contain in the Backoffice framework? Note: There are 2 correct answer to this question.
* Spring beans of backoffice web context
* Context configuration object definition
* Virtual socket definition
* Widget connection
