[Nov-2023 Get 100% Real H13-611_V4.5-ENU Free Online Practice Test BEST Verified Huawei H13-611_V4.5-ENU Exam Questions (2023)]

Huawei H13-611_V4.5-ENU certification exam is an essential certification for IT professionals who want to demonstrate their expertise in storage systems and technologies. HCIA-Storage V4.5 certification is highly valued by employers and is an excellent way to enhance one's career prospects. By passing H13-611_V4.5-ENU exam, IT professionals can showcase their knowledge and skills in managing and maintaining storage systems, and become a valuable asset to their organization.

QUESTION 200

In a RAID 5 composed of three disks, if 10110110 and 11010011 are written to two data disks forming the same strip at the same time, then 01100101 will be written to the parity disk.

- * True
- * False

QUESTION 201

The SATA connector can support both SATA and SAS hard drives.

- * TRUE
- * FALSE

QUESTION 202

Taking OceanStor Huawei all-flash storage products as an example, which of the following descriptions of the indicators are correct? (Multiple Choice)

- * The alarm indicator in the control box turns amber to indicate that there is a warning in the control box.
- * The frame is positioned in the controller frame. The indicator light is steady blue, indicating that the controller frame is being positioned.
- * The power button and power indicator must be separate.

QUESTION 203

Which of the following is NOT the characteristics of the active-active mode of a storage controller?

- * Two controllers process the I/O requests from application servers concurrently.
- * If a controller becomes faulty, the other takes over the work of the faulty controller without disrupting ongoing services.
- * The primary controller processes the I/O requests from application servers and the secondary controller is in the idle state.
- * The active-active mode achieves load balancing, full utilization of resources, and system performance improvement.

QUESTION 204

The multipath load balancing strategy used by HUAWEI OceanStor storage products is the default?

- * Polling
- * Minimum queue depth
- * the minimum task
- * Minimum IO number

Resolution: [View product documentation.](#)

QUESTION 205

Match the correct functionalities together: (1) IaaS (2) Hybrid (3) SaaS (a) Combination of public and private (b) Applications are hosted externally (c) Hardware is outsourced.

- * 1-a; 2-b; 3-c
- * 1-b; 2-c; 3-a
- * 1-c; 2-a; 3-b
- * 1-b; 2-a; 3-c

QUESTION 206

HA (High Availability) refers to the ability to continue to access applications in the event of a single component failure of the local system.

In a data center, the downtime is one hour in a year. What is the HA of this data center?

- * 0.99999
- * 0.9998858
- * 0.999999
- * 0.998934

QUESTION 207

Which of the following statements about the evolution of storage network architecture is correct?

- * Users first generated storage requirements due to the increase in data volume, which resulted in the earliest and simplest storage architecture SAN
- * SAN provides file storage, and its emergence solves the inconvenience of file sharing in the DAS architecture
- * Compared with DAS architecture, NAS architecture can better provide file sharing services
- * Distributed storage appeared at the same time as DAS, providing better scalability for DAS architecture

QUESTION 208

Huawei's full-flash storage system uses the Smart Matrix architecture to achieve front-end and back-end interconnection, and the failure of any controller does not affect normal business operations.

- * True
- * False

QUESTION 209

Huawei storage deduplication feature, first write to disk, find free time to read and delete.

- * TRUE
- * FALSE

QUESTION 210

Huawei focuses on IT infrastructure in the ICT field.

- * TRUE
- * FALSE

QUESTION 211

Which of the following descriptions are correct about the hard disk interface? (Multiple Choice)

- * The hard disk interface is the hard disk cache and memory for data exchange
- * The hard disk interface is to connect the hard disk to the host system
- * The speed of the hard disk interface affects the data exchange between the CPU and the memory
- * The speed of the hard disk interface affects the performance of the storage

QUESTION 212

Situation: Disk Domain A has 40 disks, Disk Domain B has 20 disks. True or False: the rebuild time for a failed disk in Disk Domain B is longer than for a failed disk in Disk Domain A.

- * TRUE
- * FALSE

QUESTION 213

Which of the following statement about the three iSCSI connection methods is correct?

- * The connection method of Ethernet card+initiator software does not occupy host resources at all
- * The connection method of hardware TOE network card+initiator software reduces the pressure on host resources
- * The iSCSI HBA card completes the TCP/IP protocol conversion without occupying host resources at all
- * TOE network card completes the conversion of iSCSI packets to TCP/IP packets

QUESTION 214

Which is correct about HyperMeteor? (Multiple Choice)

- * The local site and the remote site can run services at the same time
- * It can only be configured between storage devices of the same model and version
- * Support automatic storage failover
- * Arbitration server must be configured

QUESTION 215

The failure of an SSD is more predictable than that of other disk technologies.

- * TRUE
- * FALSE

QUESTION 216

Regarding the advantages of DAS, which of the following descriptions is correct? (Multiple choice)

- * The deployment is simple
- * Large initial investment
- * Small network complexity
- * The configuration is more complicated
