**Q10.** What are your options if an out-of-the-box integration between SAP S/4HANA Cloud and another SAP solution is NOT available? (Choose two.)

- \* Infrastructure as a Service
- \* Custom CDS Views
- \* Unrestricted firewall
- \* Integration tools

**Q11.** Where do you specify the retention time of temporary data in the SAP S/4HANA Migration Cockpit?

- \* In the migration object template
- \* In the migration object
- \* In the migration project
- \* In the staging tables

**Q12.** You are implementing SAP S/4HANA Cloud for a company that manufactures bicycles and bicycle parts. The accountant is confused with the available account types.

When creating an account for costs of printing marketing materials, which account type should they choose?

- \* Secondary cost account
- \* Non-operating expense
- \* Balance Sheet
- \* Primary cost account

When creating an account for costs of printing marketing materials, you should choose the primary cost account type. A primary cost account is an account that records the costs that are directly incurred by a business process or activity, such as materials, labor, or services. A primary cost account is usually assigned to a cost element category that defines how the costs are posted and analyzed in Controlling (CO). For example, cost element category 1 is used for primary costs or revenues that are posted from Financial Accounting (FI).

**Q13.** Which of the following changes would prevent SAP from running automated business process tests on your behalf? Note: There are 2 correct answers to this question.

- \* SAP-made changes to the standard test process
- \* Configuration changes that impact the process flow
- \* Changes to the SAP S/4HANA Cloud release (upgrade)
- \* Changes to the data input requirements (custom data fields)

Configuration changes that impact the process flow and changes to the data input requirements (custom data fields) would prevent SAP from running automated business process tests on your behalf. These changes would require you to update your test processes and data accordingly, as the standard test processes and data provided by SAP would no longer match your configuration and requirements. SAP-made changes to the standard test process and changes to the SAP S/4HANA Cloud release (upgrade) would not prevent SAP from running automated business process tests on your behalf, as these changes are already reflected in the standard test processes and data provided by SAP. You can use these standard test processes and data as they are or adapt them to your needs

**Q14.** What does the journal entry type control?

- \* The transaction currency types allowed to be posted
- \* The types of accounts allowed to be posted to
- \* The ledgers updated by the posting values
- \* Whether a posting posts a debit or credit value

**Q15.** You want to authenticate employees in SAP Cloud Identity.

In which app can you download a .CSV file with the list of users?

- \* Maintain catalog roles
- \* Maintain communication users
- \* Maintain business roles
- \* Maintain business users

You can download a .CSV file with the list of users in the Maintain Business Users app. The Maintain Business Users app allows you to create, edit, and delete business users in SAP S/4HANA Cloud. You can also assign business roles, communication users, and catalogs to business users. You can use the Export function in the app to download a .CSV file with the list of users and their details, such as user ID, name, email, status, or last login date.

**Q16.** What are the 3 key components of the Intelligent Enterprise SAP offering? (Choose three.)

- \* Intelligent Data Analytics
- \* Intelligent Technologies
- \* Intelligent Suite
- \* Digital Platform

\* Intelligent Enterprise Architecture

**Q17.** Which tool do you use to develop your own cloud applications for SAP S/4HANA Cloud?

- \* SAP Cloud SDK
- \* SAPUI5 SDK
- \* SAP ADK
- \* SAP HANA Studio

**Q18.** Your customer wants to simplify the process of outgoing payment management. Which offering do you recommend?

- \* SAP Cash Application
- \* SAP Multi-Bank Connectivity
- \* SAP RealSpend
- \* SAP Bank Analyzer

**Q19.** Which transition scenario fits a customer who is interested in moving to SAP S/4HANA Cloud, but is not ready for full process redesign?

- \* System Conversion
- \* Landscape Transformation
- \* Selective Data Transition
- \* New Implementation

**Q20.** When is the Quality system activated?

- \* After the Starter system is terminated
- \* After SAP Best Practices content is migrated from the Starter system to the Quality system
- \* After a new change project is created
- \* After the organizational structure and chart of accounts are defined

The quality system is activated after SAP Best Practices content is migrated from the starter system to the quality system. This is done by using the Migrate Your Data app in the starter system. The quality system is used for testing, configuration, and data migration activities. The starter system is terminated after the quality system is activated. The organizational structure and chart of accounts are defined in the starter system, not in the quality system. A new change project is created after the quality system is activated, not before.

**Q21.** Which customizing task on the sender system needs to be completed before sending cash flows to a SAP S/4HANA Cloud Treasury workstation?

Note: There are 2 correct answers to this question.

- \* Reassign company codes
- \* Convert sender planning groups
- \* Activate Individual Source Applications
- \* Rebuild flow types in accounting documents

**Q22.** Where can you find content to set up an integration if there is no SAP Best Practices content available?

- \* SAP BTP Cockpit
- \* SAP Fiori Apps Reference Library
- \* SAP API Business Hub
- \* SAP Extensibility Explorer

**Q23.** What are some responsibilities of a Customer Center of Expertise (CCOE)? Note: There are 3 correct answers to this question

- \* Conduct risk-based assessments to determine the value of activating new processes.
- \* Determine KPIs that will support a continuous improvement mindset.

- \* Reduce the total cost of ownership for IT.
- \* Serve as a central contact for SAP and manage interactions with the SAP Service Center.
- \* Ensure the resources necessary for the project's success are available.

**Q24.** Which data is entered in the asset migration file for each asset master record?

- \* Cumulative acquisition values in group currency
- \* Cumulative acquisition values in all currencies
- \* Accumulated depreciation values in group currency
- \* Accumulated depreciation values in company code currency

**Q25.** For which of the following activities is the starter system used?

- \* Transport the solution configuration to the quality system.
- \* Set up the Test Automation Tool.
- \* Run integration testing.
- \* Document delta requirements in the backlog.

**Q26.** You are performing data migration using the SAP S/4HANA Migration Cockpit. The same record exists twice in your upload file. At which stage does the upload of the migration template fail due to the duplicated record?

- \* Convert Values
- \* Validate Data
- \* Execute Import
- \* Simulate Import

The upload of the migration template fails due to the duplicated record at the Simulate Import stage. The Simulate Import stage is where the system checks the consistency and validity of the data in the migration template before importing it into SAP S/4HANA Cloud. If there are any errors or warnings in the data, such as duplicated records, missing values, or incorrect formats, the system will display them in the log file and prevent you from proceeding to the next stage. You need to correct the errors or warnings in the migration template before you can continue with the import process. The Convert Values stage is where the system converts values from external formats to internal formats, such as currencies, units of measure, or date formats. The Validate Data stage is where the system validates the data against predefined rules and checks for any inconsistencies or errors. The Execute Import stage is where the system imports the data into SAP S/4HANA Cloud after passing all previous stages.

**Q27.** You are creating users in SAP S/4HANA Cloud

For which purpose do you use the business catalogs?

- \* To provide users access to the apps. relevant for their business functions
- \* To configure the authorization objects for which the user is responsible
- \* To create or change passwords for users per business role
- \* To add, change or delete new process steps within the scope item
