

[Jan 09, 2024] Achieve your Success with Latest Veeam VMCE2021 Exam [Q120-Q136]

Achieve your Success with Latest Veeam VMCE2021 Exam [Jan 09, 2024]
The VMCE2021 Exam Test For Brief Preparation

Veeam Certified Engineer 2021 (VMCE2021) certification is a globally recognized certification that validates one's expertise in Veeam Availability Suite v11, which is the latest version of Veeam's data protection and disaster recovery software. VMCE 2021 certification is designed for IT professionals who are responsible for managing and implementing Veeam solutions in their organizations. The VMCE2021 certification exam measures the candidate's knowledge and skills in implementing, configuring, and troubleshooting Veeam solutions.

To prepare for the VMCE2021 exam, candidates can attend official Veeam training courses, study the exam objectives, and practice with Veeam software. Veeam offers several training courses that cover the topics included in the exam. These courses are available both in-person and online. In addition, Veeam provides study guides and practice exams to help candidates prepare for the exam.

QUESTION 120

A virtual machine in your environment has been hit by a virus. You need to restore the virtual machine as fast as possible. At the same time, you need to make sure that any dormant virus on the backed up virtual machine is detected. What restore method should you use when recovering to a new location?

- * Instant VM Recovery with staged restore;
- * Instant VM Recovery with secure restore;
- * SureBackup
- * Virtual disk restore

QUESTION 121

Which of the following is the extension of a Veeam Backup & Replication configuration backup file?

- * .bco
- * .vbk
- * .vbm
- * .cbo
- * The file extension is specified in the configuration backup settings.

https://helpcenter.veeam.com/docs/backup/vsphere/export_vbr_config.html?ver=95

QUESTION 122

Which permission roles can be assigned in Veeam Backup Enterprise Manager for delegation of responsibilities? (Choose three.)

- * Restore Operator
- * db_owner
- * Portal Administrator
- * Power User
- * Portal User

https://helpcenter.veeam.com/docs/backup/em/veeam_backup_em_roles.html?ver=95

QUESTION 123

Which type of jobs can be sent to tape using a Backup to Tape job? (Choose two.)

- * Backup
- * Backup Copy
- * Replication
- * Configuration Backup

QUESTION 124

Which of the following predefined tests can be performed during a SureBackup verification test on a backup file? (Choose three.)

- * Application test
- * Heartbeat test
- * Ping test
- * SAN check
- * Boot time
- * OS test

https://helpcenter.veeam.com/docs/backup/vsphere/surebackup_tests.html?ver=100

QUESTION 125

Which of the following is an extension for a full backup file if the Reverse Incremental Backup mode is used?

- * .vbr
- * .vbi
- * .vrb
- * .vbk

QUESTION 126

A backup administrator needs to restore two data drives to a VM where the operating system remains intact. The target machine must remain powered on. What recovery option is most appropriate to perform this operation?

- * Instant VM Recovery
- * Instant disk recovery
- * Restore entire VM
- * Restore VM files

Recover a VM disk and keep the target VM (to which you want to attach the disk) turned on.

https://helpcenter.veeam.com/docs/backup/vsphere/instant_disk_recovery.html?ver=100

QUESTION 127

A company wants to leverage Veeam DataLabs to automate the creation of a test environment. As testing one large, multi-VM application could require more than a single host, a dedicated VMware ESXi cluster has been identified. The sandbox is to be refreshed weekly or on demand. Select the benefits of using replication jobs in this environment. (Choose two.)

- * There are additional tests available in DataLabs when replicas are the source
- * Replication jobs do not stop the sandbox, unlike backup jobs
- * The VMs are running directly on a high performance datastore, uncompressed
- * There is a bigger number of VMs supported for multi-VM application tests when replicas are used
- * Replicas can take advantage of advanced multi-host virtual labs

https://helpcenter.veeam.com/docs/backup/vsphere/surereplica_advanced_multihost.html?ver=100

QUESTION 128

A Windows VM running on Microsoft Hyper-V is protected using the file indexing option. The guest interaction proxy is offline. Which of the following Veeam servers will be used to deploy the runtime during the backup process?

- * Backup & Replication server
- * Indexing database server
- * File proxy server
- * Virtual lab server

https://helpcenter.veeam.com/archive/backup/110/hyperv/guest_interaction_proxy.html According to the Veeam Software Help Center1, Veeam Backup & Replication deploys runtime components on a VM guest OS to perform file indexing. These components can be either non-persistent or persistent depending on whether you have enabled application-aware processing for the VM.

If you have enabled application-aware processing for the VM, Veeam Backup & Replication uses a persistent agent component that is installed on the VM guest OS during backup job session and remains on the VM after that. In this case, if the guest interaction proxy is offline, Veeam Backup & Replication will use another available guest interaction proxy or fail over to the backup server.

If you have not enabled application-aware processing for the VM, Veeam Backup & Replication uses a non-persistent runtime component that is deployed on the fly and removed after indexing is complete. In this case, if the guest interaction proxy is offline, Veeam Backup & Replication will use another available guest interaction proxy or fail over to the backup server.

QUESTION 129

A Veeam administrator is concerned about keeping backups on site and has traditionally used tapes to store backups older than 30 days in order to free up space on their backup repository for longer-term storage. The company is currently using Scale-out Backup Repositories. What option would satisfy the requirement?

- * Copy to capacity tier
- * Move to capacity tier
- * Backup to object storage
- * File copy job

QUESTION 130

Which mechanism allows network traffic to flow into the virtual lab while protecting the production environment from the contents of the virtual lab?

- * Configured alias record in the production DNS server
- * Configured alias record at the proxy appliance
- * A routing table configured in VirtualLab settings
- * Veeam's proprietary filtering mechanism
- * IP Masquerading

https://helpcenter.veeam.com/docs/backup/vsphere/surebackup_ip_masquerading.html?ver=95

QUESTION 131

An administrator has been asked to create a dynamic backup job for all VMware VMs in the legal department that have a one-hour RPO. How can this be accomplished?

- * Modify a custom CSV file to be scanned before the start of each job.
- * Create a job with all the required machines, and manually edit the job as new VMs are deployed.
- * Create a backup job based on vSphere tags.
- * In Enterprise Manager, create a script using the REST API to run periodically to scan for new VMs that fit the criteria.

QUESTION 132

What should be implemented when backing up NAS file shares to ensure there is more than one copy of the data?

- * Cache repository
- * Archive repository
- * Backup repository
- * Secondary copy

QUESTION 133

Is it possible to switch between backup modes in a backup job?

- * No, if you want to create backups using another mode, you have to create another backup Job.
- * Yes, but in this case, you will have to specify a new backup repository.
- * Yes, the new mode leaves existing backups as they are and continues creating backups in the same backup repository.
- * Yes, the new mode will transform all existing backups in the appropriate way and continue creating backups in the same backup repository.

QUESTION 134

Choose the correct statements about the Failover Plan functionality: (Choose two.)

- * Undo failover can be performed for the entire Failover Plan group
 - * The whole Failover Plan group can be failed back using the Commit failback option
 - * Failover Plans must be created in advance of a disaster situation
 - * A Failover Plan is permanent recovery solution that doesn't need to be finalized
- https://helpcenter.veeam.com/docs/backup/cloud/cloud_failover_plan_overview.html?ver=95

QUESTION 135

Which of the following is a backup mode that can be configured within a Veeam Agent for Windows backup job?

- * Reverse incremental with periodic active full backups
- * Forward incremental and reverse incremental, both with optional periodic synthetic and/or active full backups
- * Forward incremental with optional periodic synthetic and/or active full backups
- * Reverse incremental with optional periodic synthetic full backups

Veeam Agent for Windows don't have the option to select reverse incremental backup chain.

https://helpcenter.veeam.com/docs/agentforwindows/userguide/backup_chain.html?ver=40

QUESTION 136

Which of the following can help reduce the amount of traffic that is sent over the network during the second run of a replication job?

- * Replica seeding
- * Re-IP rules
- * Replica mapping
- * WAN acceleration for replicas

Explanation

https://helpcenter.veeam.com/docs/backup/vsphere/replica_seeding.html#:~:text=Replica%20seeding%20and%2
