- * SAP Activate Roadmap
- * SAP Maintenance Planner
- * SAP Solution Manager
- * SAP Best Practices Explorer

Q27. Why do you configure output control for service quotations?

- * You need to define the possible follow-up steps after service quotation confirmation.
- * You need to define the dependencies between statuses a service quotation can have.
- * You need to define in which form a service quotation needs to be sent to a customer.
- * You need to define the prerequisites for service quotation confirmation by the customer.

Q28. In which scenario would you use Read Access Logging (RAL) to determine the information?

- * If a business user accessed data in a custom field of an application
- * If a business user accessed a business partner's personal data
- * If a business user has restrictions when accessing data in an application
- * If the authorizations for a business user are missing or insufficient

Q29. What are customers able to scope in SAP S/4HANA Cloud with SAP Central Business Configuration?

Note: There are 2 correct answers to this question.

- * Countries where business processes will run

- * Scope extensions
- * Public sector processes
- * Pre-defined scenario bundles

Q30. You are working in an SAP S/4HANA Cloud system where scope item In-House Repair (3XK) has been activated.

What is the purpose of using the Perform Prechecks app?

- * Before starting the actual repair process, you can perform a predefined set of preliminary work steps like disassembly.
- * Before starting the actual repair process, you can check whether enough capacity is available to start the repair process.
- * You can check whether all customer-related prerequisites for a repair process have been fulfilled like the existence of a (repair) contract.
- * You can decide for each repair object whether it needs repairing or should be sent back to the customer.

Q31. Based on the SAP Activate methodology, which activities must you perform in the Explore phase?

Note: There are 2 correct answers to this question.

- * Use the Quality system to demonstrate SAP Best Practice processes.
- * Conduct the Fit-to-Standard analysis to gather configuration values.
- * Define the organizational structure and chart of accounts.
- * Conduct the Digital Discovery Assessment to identify extension requirements.

Q32. What are some reasons you cannot remove a test process from a test plan?

Note: There are 2 correct answers to this question.

- * The test process has not been made visible.
- * Data binding exists with another process.
- * The test plan user has not been created yet.
- * The test plan has already been executed.

Q33. Scope item Subscription Management with Sales Billing (57Z) has been activated.

How can subscriptions be created?

Note: There are 2 correct answers to this question.

- * As part of a solution order in SAP Subscription Billing
- * Automatically out of a service contract
- * Via an API (Application Programming Interface)
- * Manually using a dedicated SAP Fiori app

Q34. Where can you find packaged integration content if there is no SAP Best Practices content available?

- * SAP Extensibility Explorer
- * SAP API Business Hub
- * SAP Fiori Apps Reference Library
- * SAP BTP Cockpit

Q35. The SAP S/4HANA Cloud – Service line of business (LoB) solution supports various scope items for Event- Based Revenue Recognition (3M3, 3M4 and 3M5).

Why is more than one scope item required for the Event-Based Revenue Recognition?

- * To support the calculation of different key performance indicators (KPIs) for margin (like Profit Margin)

1 and Profit Margin 2)

- * To support different integration scenarios (like SAP S/4HANA On Premise and SAP Field Service Management)
- * To support different accounting principles (like IFRS and US GAAP)
- * To support different document types (like service notifications and service orders)

Q36. What defines the organizational entities that are required in SAP Central Business Configuration?

Note: There are 2 correct answers to this question.

- * System consistency checks
- * The selected deployment target
- * Added partner content
- * The selected scope

Q37. What is the primary goal of using a solution order in an SAP S/4HANA Cloud system?

- * To enable an SAP customer to only use one document type for all service-related processes, replacing service contracts, service orders and so on.
- * To enable an SAP customer to provide a specific and detailed pre-defined solution to a problem for one of their customers.
- * To enable an SAP customer to only use one document type for all sales and service processes, replacing sales orders, service contracts, service orders and so on.
- * To enable an SAP customer to address their market for selling, delivering and managing combinations of (project) services, subscriptions and products using one overall document for one of their customers.

Q38. The scope item Service Quotation (4GA) can be used to create a service quotation for a customer.

Which features are available?

Note: There are 2 correct answers to this question.

- * A service quotation can be automatically converted into a service contract with either Fixed Pricing or Time & Material-based pricing.
- * A service quotation can automatically create a service order when accepted.
- * A service quotation can automatically create a service notification when accepted.
- * A service quotation can represent either a Fixed Price or a Time & Material cost estimate to a customer.
