SAP C_ACTIVATE22 Exam Syllabus Topics:

TopicDetailsTopic 1- Describe the methodology foundation, its phases, and key activities- Explain how to transform your existing solution into SAP S- 4HANA CloudTopic 2- Explain how to transform your existing solution into SAP S- 4HANA on premise- Transition Path "System Conversion" and "Selective Data Transition"Topic 3- Describe how the project team prepares release and sprint plans- Explain how to transform your existing SAP system into an SAP S- 4HANA solutionTopic

4   - Introduce the SAP Activate solution adoption framework and its content prvisioning tools- SAP Activate Methodology Foundation and Tools

NO.46 What is the difference between the “New Implementation of SAP S/4HANA Cloud, public edition” and the “New Implementation of SAP S/4HANA, private edition” transition paths? Note: There are 2 correct answers to this question

* SAP S/4HANA Cloud, public edition does NOT offer built-in capabilities for extensibility, while SAP S/4HANA Cloud, private

edition offers a full development environment

* -I SAP S/4HANA Cloud, private edition is only available through SAP Cloud services and with embedded implementation services from SAP
* Upgrades of SAP S/4HANA Cloud, public edition are based on SAP timelines, and upgrades of SAP S/4HANA Cloud private edition are based on timelines agreed between SAP and the customer
* SAP S/4HANA Cloud, private edition uses the Implementation Guide (IMG) and SAP S/4HANA Cloud, public edition uses SAP Central Business Configuration.

C is correct because upgrades of SAP S/4HANA Cloud, public edition are based on SAP timelines, and upgrades of SAP S/4HANA Cloud, private edition are based on timelines agreed between SAP and the customer. This is one of the differences between the two transition paths. SAP S/4HANA Cloud, public edition has mandatory quarterly upgrades that are performed by SAP, while SAP S/4HANA Cloud, private edition has optional upgrades that are scheduled by the customer in coordination with SAP.

D is correct because SAP S/4HANA Cloud, private edition uses the Implementation Guide (IMG) and SAP S/4HANA Cloud, public edition uses SAP Central Business Configuration. This is another difference between the two transition paths. SAP S/4HANA Cloud, private edition allows more flexibility and customization in the configuration, while SAP S/4HANA Cloud, public edition follows a guided and standardized configuration process. Verified :

: [SAP S/4HANA Cloud Editions]

: [Central Business Configuration Overview]

NO.47 Which of the following tools are considered enablers for digital transformation? Note: There are 3 correct answers to this question.
* SAP Product Availability Matrix
* Software Logistics Toolset
* SAP Roadmap Viewer
* SAP Best Practices Explorer
* SAP Activate Community

NO.48 From which platform are you able to deploy a trial system within a short timeframe?
* SAP Business Technology Platform
* SAP Learning Hub
* SAP Support Portal
* SAP Cloud Appliance Library

NO.49 In which phase do you collect the main attributes of the product as per the Agile definition?
* Deploy
* Realize
* Prepare
* Explore

NO.50 Which of the following are levels in the structure of an SAP Best Practices for SAP S/4HANA Solution Package?Note: There are 2 correct answers to this question.
* Configuration Guides
* Building Blocks
* Business Process Scenarios
* Scope Items

NO.51 Which of the following tools can support you in managing requirements and software development for implementation projects? Note: There are 2 correct answers to this question

* Focused Build for SAP Solution Manager
* Focused Insights for SAP Solution Manager
* SAP Focused Run
* SAP Cloud ALM

NO.52 When conducting an upgrade of an SAP S/4HANA Cloud, public edition three system landscape, in which phase are the Business Roles updated?
* Discover
* Deploy
* Realize
* Explore

NO.53 According to the Definition of Done, which activity must be completed for each Sprint?
* End-user training must be delivered
* The solution must be built and configured in the development system (DEV)
* Functionality must be released to the business
* Functionality must be tested in the production system (PROD)
B is correct because according to the Definition of Done, the solution must be built and configured in the development system (DEV) for each Sprint. This means that all user stories in the Sprint backlog must be completed, tested, and accepted by the product owner in the DEV system before moving to the next Sprint. Verified :

NO.54 What does the Side-by-Side extensibility option mean?
* SAP S/4HANA extensions are context-aware and focused on tight integration.
* There are two SAP S/4HANA instances: one for standard code and another for custom developments.
* Extensibility is based on the SAP Business Transformation Platform (BTP) and published APIs.
* Reporting is transferred to an enterprise data warehoused based on SAP BW/4HANA
C is correct because extensibility based on the SAP Business Technology Platform (BTP) and published APIs is what the Side-by-Side extensibility option means. Side-by-Side extensibility is a type of extensibility that allows customers to create custom applications or extensions that run on a separate platform, such as SAP BTP, and communicate with the SAP S/4HANA system via published APIs. Side-by-Side extensibility enables customers to enhance their SAP S/4HANA solution without modifying the core code or configuration, and to leverage the capabilities of SAP BTP, such as cloud services, development tools, or integration options. Verified :

NO.55 Which of the following best outlines the sequence of testing in the Realize phase?
* 1. String test 2. User Acceptance Test 3. Integration Test
* 1. Data Migration 2. String test 3. User Acceptance Test
* 1. String test 2. Integration Test 3. User Acceptance Test
* 1. Integration Test 2. User Acceptance Test 3. String test

NO.56 Which systems are part of the private cloud edition landscape?Note. There are 2 correct answers to this question.
* Sandbox
* Evaluation
* Production
* Starter

NO.57 Which of the following tools can support you in managing requirements and software development for implementation projects? Note: There are 2 correct answers to this question
* SAP Focused Run
* Focused Build for SAP Solution Manager
* Focused Insights for SAP Solution Manager

* SAP Cloud ALM

B is correct because Focused Build for SAP Solution Manager is a tool that supports the management of requirements and software development for implementation projects. It provides features such as requirements-to-deploy process, collaboration platform, quality gate management, and test management.

D is correct because SAP Cloud ALM is a tool that supports the management of requirements and software development for implementation projects. It provides features such as project task management, solution documentation, change request management, and test management. Verified :

NO.58 You are defining the testing strategy for your project.What would you include in a Scope of Integration test?
* The functionality of end-to-end business processes
* The network communication
* The functionality of modular processes
* The connectivity between database and application servers

A is correct because the functionality of end-to-end business processes is one of the things that you would include in a Scope of Integration test. The integration test is a test that verifies that the solution works as expected across different systems and interfaces, and supports the complete business scenarios that are relevant for the customer. Verified :

NO.59 What criterion does the product owner use to sequence the product backlog?
* Business priority
* Resource availability
* Relative effort
* Complexity

A is correct because the product owner is responsible for prioritizing the product backlog based on the business value and urgency of each user story3. Verified :

3: SAP Activate Project Management Certification Guide, page 112

NO.60 Which of the following is the customer's responsibility in both on-premise and private cloud scenarios?
* Middleware
* Operating system
* Database
* Servers

NO.61 Which new role is introduced in the SAP activate methodology in a full scrum team?
* Project manager
* Product owner
* Application consultant
* System administrator

NO.62 What is the Primary Purpose of the SAP Activate Methodology ?
* To enable access to the SAP ecosystem
* To Provide the Sequence of actions in the project
* To provide end-to-end Application Lifecycle Management
* To manage solution documentation

NO.63 How do you setup scrum teams.

There are 2 correct answers to this
* Based on group size, but a minimum of 12 people

* Based on end-to-end processes like order-to-cash
* By type of work, like configuration scrum, documentation scrum and testing scrum.
* Asa cross- functional team covering multiple functions, like configuration, data loads and Testing

NO.64 Ready-to-use Content in SAP Activate incudes which of the following There are 2 correct answers to this question
* Project Accelerators
* SAP Best Practices
* Courses delivered by SAP Education
* Business Models from leading companies in each industry sector

NO.65 Which of the following activities take place during the Discover phase in an SAP BW/4HANA implementation?Note: There are 2 correct answers to this question.
* Discuss the Benefits of SAP Data Warehouse Cloud.
* Create, review, and sign off the Create Project Management Plan.
* Discuss the Benefits and Functionality of SAP Analytics Cloud.
* Create, review, and sign off the Project Charter.

NO.66 What is the order of artifacts within the technical architecture and infrastructure workstream In the prepare phase?
* Technical strategy>hardware specification from hardware vendor>parameters hardware seizing Calculation>hardware seizing work
* Hardware specification from hardware vendor>parameter’s hardware seizing calculation>hardware seizing result>technical strategy work
* Hardware specification from hardware vendor>technical strategy>parameter’s hardware seizing Calculation>hardware seizing
* Technical strategy>parameter’s hardware>seizing calculation>hardware seizing results>Hardware specification from hardware vendor

NO.67 What is the objective of using scaling Scrum techniques when coordinating large teams in complex projects?
* To bring all specialists, such as the company legal advisors, into the scrum team
* To manage the flow of information between the project and stakeholders
* To reallocate staff to skill-based teams such as developers in one single team
* To ensure alignment in architecture, configuration, and integration
