

## New CSCM-001 Dumps For Preparing GAQM: Supply Chain And Retail Management Certified GAQM Exam Well [Q22-Q44]

## New CSCM-001 Dumps For Preparing GAQM: Supply Chain And Retail Management Certified GAQM Exam Well [Q22-Q44]

New CSCM-001 Dumps For Preparing GAQM: Supply Chain And Retail Management Certified GAQM Exam Well  
Updated CSCM-001 Dumps Questions Are Available [2024] For Passing GAQM Exam

**NO.22** How can companies improve supply chain cost management?

- \* By ignoring cost analysis
- \* By implementing cost-saving measures and optimizing resources
- \* By increasing inventory levels
- \* By extending production cycles

**NO.23** Which strategy helps mitigate supply chain disruptions?

- \* Relying on a single supplier
- \* Diversifying the supplier base
- \* Reducing inventory buffers
- \* Limiting supply chain visibility

**NO.24** Which factors are considered in supply chain risk management?

- \* Supplier reliability, market fluctuations, natural disasters

- \* Employee turnover, product development, branding
- \* Marketing strategies, customer satisfaction, logistics
- \* Production techniques, inventory types, warehousing costs

**NO.25** What is the main advantage of supplier diversification?

- \* Reducing negotiation power
- \* Mitigating risks and ensuring supply continuity
- \* Increasing dependency on a single supplier
- \* Limiting market reach

**NO.26** What is the significance of cost-to-serve analysis in supply chains?

- \* Ignoring customer profitability
- \* Identifying the true cost of serving different customers
- \* Reducing pricing transparency
- \* Limiting market analysis

**NO.27** How does crossfunctional team collaboration enhance supply chain management?

- \* By increasing departmental silos
- \* By improving coordination and decisionmaking
- \* By reducing communication
- \* By complicating project management

**NO.28** Identify the key factor in effective demand forecasting within supply chains.

- \* Product lifespan
- \* Historical sales data
- \* Employee skill level
- \* Production capacity

**NO.29** Which factor is crucial for successful inventory turnover?

- \* High inventory levels
- \* Accurate demand forecasting
- \* Long lead times
- \* Multiple warehouse locations

**NO.30** Identify the benefit of integrated supply chain planning.

- \* Disconnected planning processes
- \* Synchronized operations and improved decisionmaking
- \* Increased planning time
- \* Reduced demand visibility

**NO.31** How does predictive analytics enhance supply chain planning?

- \* Increasing forecast errors
- \* Improving accuracy and reducing uncertainty
- \* Limiting data insights
- \* Reducing operational efficiency

**NO.32** Which of the following improves supply chain sustainability?

- \* Ignoring environmental regulations
- \* Implementing ecofriendly practices and technologies
- \* Increasing resource consumption

- \* Reducing supply chain transparency

**NO.33** How can companies improve supply chain sustainability?

- \* By ignoring environmental impacts
- \* By adopting green practices and reducing waste
- \* By increasing resource consumption
- \* By reducing supplier collaboration

**NO.34** Identify the benefit of implementing a vendormanaged inventory (VMI) system.

- \* Reducing supplier responsibility
- \* Enhancing inventory accuracy and availability
- \* Increasing stockouts
- \* Limiting supplier communication

**NO.35** What role does inventory optimization play in supply chain management?

- \* Increasing holding costs
- \* Balancing inventory levels to meet demand while minimizing costs
- \* Limiting inventory turnover
- \* Decreasing inventory accuracy

**NO.36** What is the role of a procurement strategy in supply chain management?

- \* Managing customer relationships
- \* Ensuring costeffective and reliable supply of goods
- \* Designing product packaging
- \* Reducing supplier engagement

**NO.37** Identify the benefit of collaborative forecasting in supply chains.

- \* Increasing forecast inaccuracies
- \* Improving demand accuracy and reducing variability
- \* Limiting supplier involvement
- \* Reducing communication efforts

**NO.38** How can companies enhance their supply chain agility?

- \* By maintaining rigid processes
- \* By implementing flexible and adaptive strategies
- \* By reducing supply chain visibility
- \* By limiting technology use

**NO.39** What is the function of a demand planning system in supply chain management?

- \* Managing warehouse inventory
- \* Coordinating supplier deliveries
- \* Forecasting customer demand
- \* Reducing production times

**NO.40** What is the impact of regulatory compliance on supply chain operations?

- \* Increasing operational risks
- \* Ensuring adherence to laws and minimizing risks
- \* Reducing supply chain visibility
- \* Limiting supplier engagement

**NO.41** Identify the key challenge of managing global supply chains.

- \* Limited customer base
- \* Increased regulatory compliance
- \* Simplified transportation networks
- \* Consistent supply chain standards

**NO.42** How can companies ensure effective supplier performance?

- \* By reducing supplier engagement
- \* By establishing clear performance metrics and regular reviews
- \* By limiting communication with suppliers
- \* By avoiding supplier audits

**NO.43** How can supply chain managers improve demand accuracy?

- \* Ignoring market trends
- \* Utilizing historical data and predictive analytics
- \* Relying solely on supplier forecasts
- \* Reducing customer interaction

**NO.44** What is the advantage of using a multiechelon inventory optimization approach?

- \* Simplifying supply chain planning
- \* Balancing inventory levels across the entire supply chain network
- \* Reducing supplier collaboration
- \* Limiting market reach
