Download the Latest HPE2-T38 Dumps - 2025 HPE2-T38 Exam Questions [Q38-Q57

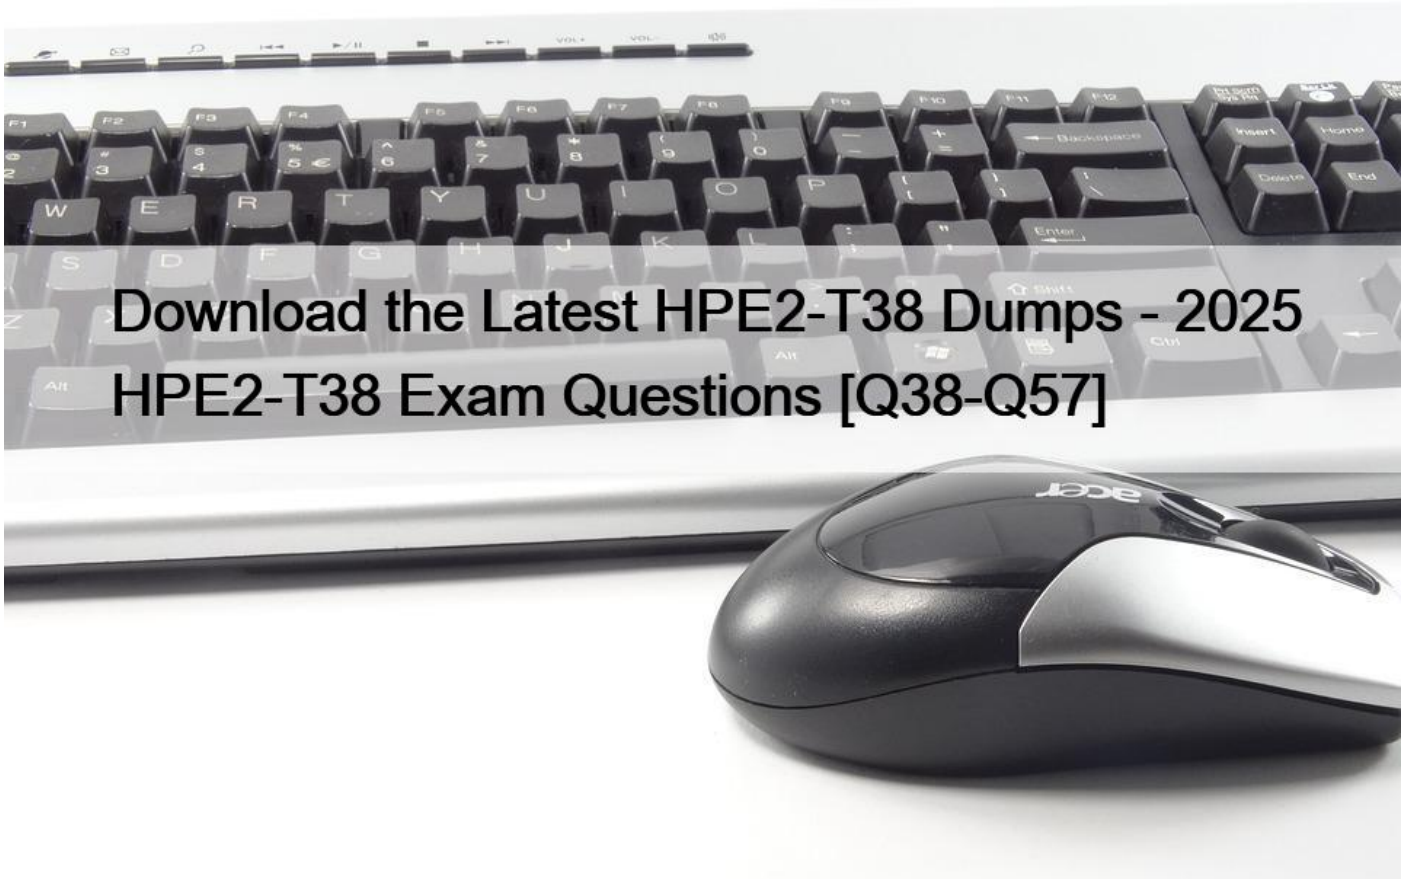

Download the Latest HPE2-T38 Dumps - 2025 HPE2-T38 Exam Questions
Latest HP HPE2-T38 Certification Practice Test Questions

NO.38 What is the primary goal of customer engagement?

Response:
* To increase product prices
* To maximize short-term sales
* To build long-term customer relationships
* To reduce marketing costs

NO.39 HPE Machine Learning Development Environment”s main focus is on:

Response:

* Enhancing user interface design
* Collaborative development of ML models
* Video editing and production
* Mobile app development

NO.40 In terms of scalability, how do HPE Machine Learning solutions compare with open-source ones?

Response:
* HPE solutions offer limited scalability
* Open-source versions offer better scalability
* Both provide similar scalability options
* HPE solutions are designed for better scalability

NO.41 ”Cross-validation” in ML is used for:

Response:
* Data encryption
* Model tuning
* Data recovery
* Algorithm selection

NO.42 HPE Machine Learning Data Management Software is designed to:

Response:
* Streamline HR processes
* Process petabyte-scale workloads
* Focus on cybersecurity
* Handle supply chain management

NO.43 How is user training typically addressed in the HPE ML PDK?

Response:
* Through extensive in-person training sessions
* Via online tutorials and documentation
* It is not provided
* Solely through third-party training providers

NO.44 Which of the following is an example of unsupervised learning?

Response:
* Decision Trees
* K-Means Clustering
* Linear Regression
* Logistic Regression

NO.45 In what way can HPE ML solutions impact a business”s customer service?

Response:
* By reducing interaction with customers
* By providing more personalized customer experiences

* By increasing the response time to customer queries
* By automating customer complaints only

NO.46 In the context of the HPE ML PDK, what does scalability refer to?

Response:
* The kit,s ability to handle increasing computational loads
* The physical size of the hardware
* The number of users that can use the kit simultaneously
* The geographic distribution of the servers

NO.47 HPE Ezmeral Unified Analytics Software is known for providing:

Response:
* Physical security systems
* Enterprise-grade versions of open-source frameworks
* 3D modeling tools
* Online education courses

NO.48 For integrating the HPE ML PDK with existing systems, what is generally required?

Response:
* A complete overhaul of the existing system
* Minimal integration with no customization
* Understanding of system APIs and compatibility
* Specialized external consultants

NO.49 How do HPE ML solutions support decision-making processes in businesses?

Response:
* By offering limited data for decision making
* By providing data-driven insights for informed decisions
* By discouraging reliance on data analytics
* By focusing only on executive opinions

NO.50 Which of these is a crucial software prerequisite for running machine learning models?

Response:
* Web browsers
* Office suites
* Machine learning libraries and frameworks
* Email clients

NO.51 What is essential for troubleshooting in the HPE ML PDK?

Response:
* Contacting HPE for every minor issue
* Access to comprehensive troubleshooting guides and support
* Guesswork and frequent trial-and-error
* Outsourcing problem resolution

NO.52 What is an important aspect of customer service in customer engagement?

Response:
* Delayed responses to inquiries
* Quick and helpful responses to customer queries
* Automated responses without personalization
* Outsourcing customer service to reduce costs

NO.53 What is the importance of data preprocessing in machine learning solutions?

Response:
* It is not necessary
* It enhances the performance and accuracy of models
* It is only for visualizing data
* It is only required for text data

NO.54 What role does personalization play in customer engagement?

Response:
* It decreases customer satisfaction
* It makes communication more generic
* It enhances customer experience and relevance
* It is irrelevant in modern marketing

NO.55 What is the role of a hidden layer in an artificial neural network (ANN)?

Response:
* It receives and weighs inputs from the preceding layer and produces outputs for the next layer.
* It assigns the label to a record, or in other words, produces the final result for the ANN.
* It ingresses parameters from a record and passively reformats those parameters without any changes over the training process.
* It does not play a role during the forward pass of data through the ANN, but it helps to optimize during the backward pass.

NO.56 What is the primary purpose of the HPE Machine Learning Development System?

Response:
* Data analysis and reporting
* Scale AI model training with minimal code rewrites
* Cloud storage solutions
* Network security enhancement

NO.57 The HPE Machine Learning Development System helps reduce:

Response:
* IT complexity
* Marketing costs
* Legal risks
* Production timelines
